Answers In Biology Florida 2012:

Going Ape Brandon Haught, 2014-04-22 Before William Jennings Bryan successfully prosecuted John Scopes in the infamous Scopes Monkey Trial he was a prominent antievolution agitator in Florida In *Going Ape* Brandon Haught tells the riveting story of how the war over teaching evolution began and unfolded in Florida one of the nation's bellwether states It still simmers just below the surface waiting for the right moment to engulf the state The saga opens with the first shouts of religious persecution and child endangerment in 1923 Tallahassee and continues today with forced delays and extra public hearings in state level textbook adoptions These ceaseless battles feature some of the most colorful culture warriors imaginable a real estate tycoon throwing his fortune into campaigns in Miami lawmakers attempting to insert the mandatory teaching of creationism into bills and pastors and school board members squabbling in front of the national media that descends into their small town The majority of participants however have been and still are average people and Haught expertly portrays these passionate citizens and the sense of moral duty that drives each of them Given a social climate where the teaching of evolution continues to sharply divide neighbors and communities *Going Ape* is a must read for anyone concerned with the future of public education

[Pandora's Garden](#) Clinton Crockett Peters, 2018-05 Pandora's Garden profiles invasive or unwanted species in the natural world and examines how our treatment of these creatures sometimes parallels in surprising ways how we treat each other Part essay part nature writing part narrative nonfiction the chapters in Pandora's Garden are like the biospheres of the globe as the successive chapters unfold they blend together like ecotones creating a microcosm of the world in which we sustain nonhuman lives but also contain them There are many reasons particular flora and fauna may be unwanted from the physical to the psychological Sometimes they may possess inherent qualities that when revealed help us to interrogate human perception and our relationship to an unwanted other Pandora's Garden is primarily about creatures that humans don't get along with such as rattlesnakes and sharks but

the chapters also take on a range of other subjects including stolen children in Australia the treatment of illegal immigrants in Texas and the disgust function of the human limbic system Peters interweaves these diverse subjects into a whole that mirrors the evolving and interrelated world whose surprises and oddities he delights in revealing
