Redding, William T. O'Donohue, Scott O. Lilienfeld, 2023-09-13 This book examines the traditional assumptions made by
academics and professionals alike that have embedded sociopolitical biases that impede practice and undermine efforts to
achieve an objective scientific status If allowed to go unchallenged the credibility of psychology as a discipline is
compromised This contributed volume thoroughly and comprehensively examines this concern in a conceptually and
empirically rigorous manner and offers constructive solutions for minimizing undue political influences within the field of
psychology Societies in the 21st century desperately need reliable psychological science but we don't have it This important
volume explains one of the main reasons why we are making little progress on any issue that gets contaminated by the left
right culture war because the field of psychology is an enthusiastic member of one of the two teams so it rejects findings and
researchers who question its ideological commitments The authors of this engaging volume also show us the way out They
diagnose the social dynamics of bias and point to reforms that would give us the psychology that we need to address 21st
century problems Jonathan Haidt Thomas Cooley Professor of Ethical Leadership NYU Stern School of Business and author of

the many incendiary topics discussed in this book If you are looking for a deep dive into real world contemporary

wouldn't need to do research we could just ask a leftist the growing political monoculture of social science is a major barrier to our search for the truth This volume shows how ideological bias should be treated as a source of research error up there with classic methodological flaws like non random assignment and non blind measurement Steven Pinker Johnstone Professor of Psychology Harvard University and the author of *Rationality* An important read for academics curious about how their politics fashions beliefs that too often are uncritically taken for granted and for non academics wondering why we can't shake off the politics that so influences scientific work Vernon Smith Nobel Laureate in Economic Sciences and George L.
