Booklet A

1. (2)

Explanation:

Not all living things can make its own food, for example fungi. Not all living things can move from one place to another, for example plants.

2. (4)

Explanation:

Flowering plants produce flowers which, upon going through pollination and fertilisation, develop into fruits. Non-flowering plants do not produce flowers and thus no fruits are developed.

3. (4)

Explanation:

Composition of air:

4. (3)

Explanation:

Water enters a plant via its roots and is then transported to all other parts of the plant via the water carrying tubes in the stem.

5. (2)

Explanation:

Ovary develops into fruit while ovules develop into seeds. Since the papaya shown is a fruit with many seeds, the flower that the fruit was produced from would have many ovules.

6. (2)

Explanation:

A mosquito does not have feathers and it can fly.

7. (3)

Explanation:

When a sperm fuses with an egg, the process is known as fertilisation. Fertilisation takes place in the fallopian tube (oviduct). The fertilised egg develops in the womb (uterus).

8. (3)

Explanation:

The water carrying tubes of a plant carry water and mineral salts from the roots. The food carrying tubes carry sugar that is made by the leaves during photosynthesis.

9. (3)

Explanation:

Both the set-ups were placed in dark rooms but with different temperatures, that is, one of the rooms was cooler than the other. Therefore, the variable that was tested is temperature.

10. (3)

Explanation:

7 days after the egg of P hatched, P was at the pupal stage. Q spent the shortest time (8 days) at the egg stage in its life cycle. Q spent 20 days while P spent 8 days at the egg and larval stages. Hence, Q spent 12 days longer than P at the egg and larval stages. P took a total of 12 days to become an adult while Q took a total of 34 days to become an adult.

Transgenics in Dispute Cristiano Luis Lenzi,2023-01-01 This book analyses the conflict over the release of transgenic soybean in Brazil based on a narrative analysis of political conflict At the end of the 1990s the commercial release of Roundup Ready RR soybean triggered a heated debate over the introduction of genetically modified organisms GMOs in Brazilian agriculture which developed into an open political conflict opposing pro and anti GMOs groups in Brazilian society This volume examines some of the structuring axes of this conflict by applying a narrative analysis of political conflict In this approach politics is perceived as a process of interpretive conflict in which participants in the political game seek to establish the lines that delimit the very definition of public issues under debate The issue of GMOs is understood from this perspective as a public controversy whose dynamics are shaped by the discourses that emerge from the dispute itself To analyze these controversies the book focuses on three

axes of narrative analyses the conflict over distributives issues associated with the commercial release of RR soy the conflict over scientific uncertainty associated with the environmental risks of GMOs and the conflict over labeling policies

Transgenics in Dispute Political Conflicts in the Commercial Liberation of GMOs in Brazil will be of interest to both social and environmental scientists concerned with the risks produced by the newest technologies that mediate our relationship with the environment and with the public debate that their use tends to provoke This book is a translation of the original Portuguese edition *Transgênicos em disputa Os conflitos políticos na liberação do comercial dos OGMs no Brasil* by Cristiano Luis Lenzi published in Brazil by Appris Editora in 2020 The translation was done with the help of artificial intelligence machine translation by the service DeepL.com The author has subsequently revised the text further in an endeavour to refine the work stylistically Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors

A Pluralist Theory of the Mind David Ludwig, 2015-10-22 This book challenges common debates in philosophy of mind by questioning the framework of placement problems in contemporary metaphysics The author argues that placement problems arise when exactly one fundamental ontology serves as the base for all entities and will propose a pluralist alternative that takes the diversity of our conceptual resources and ontologies seriously This general pluralist account is applied to issues in philosophy of mind to argue that contemporary debates about the mind body problem are built on this problematic framework of placement problems The starting point is the plurality of ontologies in scientific practice Not only can we describe the world in terms of physical biological or psychological ontologies but any serious engagement with scientific ontologies will identify more specific ontologies in each domain For example there is not one unified ontology for biology but rather a diversity of scientific specializations with

different ontological needs Based on this account of scientific practice the author argues that there is no reason to assume that ontological unification must be possible everywhere Without this ideal the scope of ontological unification turns out to be an open empirical question and there is no need to present unification failures as philosophically puzzling placement problems

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges

Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives

Outdoor Learning and Play Liv Torunn Grindheim, Hanne Værum Sørensen, Angela Rekers, 2021-07-20 This Open Access book examines children's participation in dialectical reciprocity with place based institutional practices by presenting empirical research from Australia Brazil China Poland Norway and Wales Underpinned by cultural historical theory the analysis reveals how outdoors and nature form unique conditions for children's play formal and informal learning and cultural formation The analysis also surfaces how inequalities exist in societies and communities which often limit and constrain families and children's access to and participation in outdoor spaces and nature The findings highlight how institutional practices are shaped by pedagogical content teachers training institutional regulations and societal perceptions of nature children and suitable sustainable education for young children Due to crises such as climate change and the recent pandemic specific focus on the outdoors and nature in cultural formation is timely for the cultural historical theoretical tradition In doing so the book provides empirical and theoretical support for policy makers researchers educators and families to enhance increase and sustain outdoor and nature education

Modeling the Possible Tarja Knuuttila, Till Grüne-Yanoff, Rami Koskinen, Ylwa Sjölin Wirling, 2025-02-07 Models are used to explore possibilities across all scientific fields Climate models simulate the potential future climatic conditions under various emissions scenarios macroeconomic models investigate the implications of various fiscal and monetary policy initiatives and infectious diseases models study the spread of viral diseases under a range of conditions Such modeling approaches have not gone ignored by philosophers of science but they have only recently started to explicitly address modeling the possible So far the discussion has been spread across a variety of more or less isolated pockets of debate in the philosophy of science Modeling the Possible Perspectives from Philosophy of Science draws together these studies focusing specifically on how various modeling

practices probe possibilities and justify claims concerning them The volume is divided into three sections plus an introductory chapter The introductory chapter provides a state of the art survey of the discussions of modeling possibilities within the philosophy of science as well as an introduction to the book's main themes and individual papers The three sections focus on different kinds of possibility concepts possibility spaces and how possibly modeling in practical situations The chapters contained in this volume address conceptual and theoretical issues while also presenting case studies from various scientific domains physics evolutionary and synthetic biology network science climate science economics and epidemiology Essential reading for philosophers of science epistemologists and modelers in various scientific disciplines Modeling the Possible is also suitable for anyone interested in model based scientific inferences their validity and the policy conclusions derived from them
