

Analysis of a Squirrel Gene Pool

Suppose that, after a natural disaster, a small population of 2000 squirrels were left behind. Between 1970 and 1990, they appeared at three marked locations around the edge of the preserve. These locations are generally in open and sunny habitats that attract dispersed, solitary tree-dwelling species. The following table is a summary of the genetic analysis of the 2000 squirrels. The data are presented in the following table. The data are presented in the following table. The data are presented in the following table.
