Donaldson, 1993 **Scientific and Technical Aerospace Reports** , 1980 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database

Analytical Qualification of Aircraft Structures , 1991 At its 70th meeting the Structures and Materials Panel held a Workshop to address the role of structural analysis in relation to aircraft qualification procedures in order to establish guidelines for the future and to seek out those areas where there exists a commonality of approach between nations The

Workshop provided a very useful forum for the exchange of information which is reflected in the papers presented in this report. Finite Element Bibliography Gerard De Vries, 1976-12. This bibliography had its inception in 1967 when the compilers first attempted a comprehensive coverage of the finite element literature using both manual and computer based retrieval. Initially the data base was stored on a card index but this was subsequently transferred to punched cards and magnetic tape. Computer processing was adopted at an early stage to derive the three index formats from the data base. Over the subsequent years several versions of the bibliography were produced with two of these being made available in a report form to other researchers. From the widespread interest in these documents it became evident that there was a need for a commercially available comprehensive bibliography in this area. A major effort was undertaken to revise update and extend the data base resulting in this present volume. The bibliography covers the period 1956-1975 primarily although some earlier publications of historical interest are included. The citations are not restricted to the English language and documents are listed in many languages and from diverse places of origin. All

publication formats were accepted so that references will be found to books monographs journal papers and articles theses dissertations reports surveys and the like
