introduces new portfolio performance measures relevant for sustainable investing Modern Technology for Sustainable Agriculture Arvind Kumar,V. K. Singh,Yogeshwar Singh,Susheel Kumar Singh,Pavan Kumar,2025-08-02 Modern technology for sustainable agriculture is based primarily on three platforms namely science innovation and spatial technologies These are considered as the three pioneer pillars of nation building Spatial technologies play a vital role in improving soil quality reducing the waste of water during irrigation and sharing agricultural information with farmers With the help of terrestrial aquatic and aerial sensors satellites and surveillance equipment a large volume of geo spatial data from diverse sources is collected analyzed and utilized for smart farming and shielding of crops During last five decades agricultural research and extension has focused on the development of higher productivity of crop varieties increased fertilizer use and other production technologies These have enabled the farmers to grow more food but at the same time it over exploited the resources and resulted in decreasing farm productivity and profitability To tackle such problems harmonious use of inputs through integration of various land based enterprises and their compounded responses needs further attention to make the agriculture more productive profitable and sustainable Many technologies have been identified to support sustainable use of resources and facilities including Natural Resource Management NRM Resource Conservation Technologies RCTs Integrated Farming System IFS Integrated Crop Management ICM Integrated Nutrient Management INM protected cultivation practices secondary agricultural practices and post harvest technologies **Handbook of Nature-Based Solutions to**

Mitigation and Adaptation to Climate Change Gustavo J. Nagy,Desalegn Yayeh Ayal,2025-11-04 Over recent years nature based solutions NbS have gained popularity as tools to ameliorate the effects of climate change while slowing down

the global warming process More specifically the potential of NbS has been explored in terms of meeting greenhouse gas emissions targets and fostering climate change adaptation NbS are methods that use and enhance nature to improve social and environmental challenges They involve several multifaceted actions that work sustainably to restore and protect the natural environment while helping people Therefore these solutions are useful in climate change adaptation and mitigation There are 3 main areas which NbS may target namely reducing exposure reducing sensitivity and supporting adaptive capacity Reducing exposure refers to protecting areas from existing climate change effects There is thus a perceived need to document and promote experiences related to NbS and to apply these in different contexts It is against this background that the Handbook of Nature Based Solutions to Mitigation and Adaptation to Climate Change is being produced The publication will showcase experiences related to NbS from around the world In particular it will gather examples of projects studies and the latest thinking on NbS which can serve the purpose of inspiring and fostering further works in this key area Thanks to its scope and thematic diversity the book will be of special interest to representatives from government organisations researchers and students from a wide range of natural and social sciences courses It will also provide useful information to practitioners and representatives from non governmental organisations
