Investigations in Mathematics Education ,1976 Standards-based School Mathematics Curricula Sharon L.

Senk,Denisse R. Thompson,2020-07-24 The Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula work To answer these questions the editors invited researchers who had investigated the implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify content on which performance of students using Standards based materials differed from that of students using more traditional materials and content on which performance of these two groups of students was virtually identical Additionally four scholars not involved with the development of any of the materials were invited to write critical commentaries on the work reported in the other chapters Section I of Standards Based School Mathematics Curricula provides a historical background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on the research reported in this book It provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes additional recommendations for further research In addition to the references provided at the end of each chapter other references about the Standards based curriculum projects are provided at the end of the book This volume is a valuable resource for all participants in discussions about school mathematics curricula including professors and graduate students interested in mathematics education curriculum development program evaluation or the history of education educational policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research Large-Scale Studies in Mathematics Education James A. Middleton,Jinfa Cai,Stephen Hwang,2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning

developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made. Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community. In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them. This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies. Doing the Scholarship of Teaching and Learning in Mathematics Jacqueline M. Dewar, Curtis D. Bennett, 2014-11-03 The Scholarship of Teaching and Learning SoTL movement encourages faculty to view teaching problems as invitations to conduct scholarly investigations. In this growing field of inquiry faculty bring their disciplinary knowledge and teaching experience to bear on questions of teaching and learning. They systematically gather evidence to develop and support their conclusions. The results are to be peer reviewed and made public for others to build on. This Notes volume is written expressly for collegiate mathematics faculty who want to know more about conducting scholarly investigations into their teaching and their students learning. Envisioned and edited by two mathematics faculty the volume serves as a how to guide for doing SoTL in mathematics.

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8. Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives. In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment. Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field. A Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum Harold Schoen, Steven W. Ziebarth, Christian R. Hirsch, Allison BrckaLorenz, 2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the

use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cmpmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century

Symbolic Computation and Education Shangzhi Li,Dongming Wang,Jingzhong Zhang,2007 Geosciences particularly numerical weather predication are demanding the highest levels of computer power available The European Centre for Medium Range Weather Forecasts with its experience in using supercomputers in this field organizes a workshop every other year bringing together manufacturers computer scientists researchers and operational users to share their experiences and to learn about the latest developments This volume provides an excellent overview of the latest achievements and plans for the use of new parallel techniques in the fields of meteorology climatology and oceanography

Lessons Learned from Research on Mathematics Curriculum Denisse R Thompson,Mary Ann Huntley,Christine Suurtamm,2024-09-01 This volume focuses on research related to mathematics curriculum But rather than focusing on results of research it focuses on lessons learned about conducting research on curriculum whether about design and development analysis of curriculum in the form of official standards or textbook instantiations teacher intentions related to curriculum implementation or actual classroom enactment For scholars interested in curriculum research the volume offers

lessons about conducting curriculum research that have been learned by others engaged in such work including frameworks tools and techniques as well as challenges and issues faced with solutions to address them Sharing lessons from authors of different countries strengthens the broader mathematics research community and provides insights that can help researchers make important strides forward in research on mathematics curriculum **Artificial Intelligence in Education** Ning Wang, Genaro Rebolledo-Mendez, Noboru Matsuda, Olga C. Santos, Vania Dimitrova, 2023-06-25 This book constitutes the refereed proceedings of the 24th International Conference on Artificial Intelligence in Education AIED 2023 held in Tokyo Japan during July 3 7 2023 This event took place in hybrid mode The 53 full papers and 26 short papers presented in this book were carefully reviewed and selected from 311 submissions The papers present result in high quality research on intelligent systems and the cognitive sciences for the improvement and advancement of education The conference was hosted by the prestigious International Artificial Intelligence in Education Society a global association of researchers and academics specializing in the many fields that comprise AIED including but not limited to computer science learning sciences and education **Test Validity** Howard Wainer, Henry I. Braun, 2013-07-04 Technological and theoretical changes over the past decade have altered the way we think about test validity This book addresses the present and future concerns raised by these developments Topics discussed include the validity of computerized testing the validity of testing for specialized populations e g minorities the handicapped and new analytic tools to study and measure validity **Teacher Beliefs and Classroom Performance** James Rath, Amy C. McAninch, 2003-12-01 This volume of Advances in Teacher Education is about beliefs held by teachers and addresses the important topic of teacher beliefs from a variety of disciplinary perspectives Most of the authors who have contributed to this collection of essays assume that beliefs are propositions that are felt to be true by the person embracing them but that do not necessarily rest on the kind of evidence that justifies the use of the term knowledge Teacher beliefs are an important topic because it is hypothesized that teachers and teacher candidates use them to shape the information they receive from formal teacher preparation and to direct subsequent decision making in the classroom

Effective English Learning Dr. Santhosh Kumar R, 2024-10-08 The effectiveness of English language learning packages on achievement among secondary school students can be assessed through several key factors content relevance engagement instructional design and student outcomes Firstly content relevance plays a crucial role A well designed learning package should align with curriculum standards and cater to the linguistic needs of secondary students It should include grammar vocabulary reading comprehension writing skills and oral communication components that are age appropriate and challenging enough to foster growth **Resources in Education**, 1997 **Journal of Developmental Education**, 2013

Geographical Information Systems Miguel Félix Mata-Rivera, Roberto Zagal-Flores, Daniela Elisabeth Ballari, José Antonio León-Borges, 2024-12-21 This book constitutes the refereed proceedings of the 5th Latin American Conference on Geographical Information Systems GIS LATAM 2024 held in Mexico City Mexico during September 2 6 2024 The 14 full

Fitz-Gibbon, 1987-12 The heart of the Program Evaluation Kit this volume provides a broad overview of evaluation planning and a practical guide to designing and managing programs Learn how the field of evaluation has changed over the last ten years This volume is concise informative and clearly written Major attention is given to establishing an evaluation s parameters the how to s of formative and summative evaluation and the power of evaluation studies that combine both quantitative and qualitative approaches Also covered are recently developed evaluation standards and a new emphasis on ongoing program monitoring in evaluation The Evaluator s Handbook also covers concerns user needs and other socio political factors that influence the utility of an evaluation Strategies for maximizing utility are included throughout the evaluation planning implementation and reporting process **Colorado Journal of Educational Research** ,1976

Curricular Program Implementation in the Context of Randomized Field Trials Gloria Isabel Miller, 2011 Abstract curricular program implementation in the context of randomized field trials Gloria Isabel Miller This study examined three cases of commercially available curricular program implementations to determine if a unified approach to measuring the level of implementation was possible proof of concept Further the study investigated whether the level of curriculum and implementation plan specificity made a difference to the strength of implementation achieved in classrooms and described the implementation evolution in different contexts The study sample consists of a total of 163 teachers in eight school districts across the United States In each case teachers were randomly assigned to using the curricular innovation or their currently used materials and processes The three cases HS Math NewScience and MathIntervention were purposely chosen to represent three different points of curricular and implementation specificity and two different subject areas math and science Each case features a commercially available program that also had opportunities for teachers to use electronic technology to enhance their learning or to engage their students The cases represent differing student grade levels The cases are different enough to provide a range that exercises the measurement techniques introduced in this study so results can begin to generalize across curricular programs and grades However the cases are similar enough in research design instrumentation and data collection methods to make them comparable A key contribution of this investigation is the creation of a framework to measure the level of implementation the extent to which the teacher and students display the actions behaviors and interactions expected by using the innovation The unified conceptual framework arrived at by using an Activity Theory perspective together with the analytical methods employed provide a way to view the rich complex interaction of implementation as a system with the larger system of the school organization Data from the analysis revealed that variations in the level of implementation were no different regardless of the level of specificity A strong finding of this work is that

implementation evolves slowly even when the curricular program is scripted and coaching support is provided to teachers

The paper concludes with implications for policy and future research
