Full-featured flexibility

Alice 6 LDx diagnostic sleep system

What if you could have a PSG system that helped you meet your ever-changing business and clinical needs? For the LDx base station with either the LDx or LDxH head box to have a full-featured, easy-to-understand system that allows staff to focus more on patients and less on equipment. The LDx is the perfect front-line head box for most sleep center needs. Place the LDxH only use when you need to step up from the 19 EEG inputs on the LDx to a full 20 EEG inputs. The LDx base station works with either head box, so it's easy to have the right capacity where and when you need it.

- Integrated BP drives deliver differential pressure transducer and "tophole" input (provides the number of connections during look up)
- Patent pending the EEG technology that monitors all slow-wave (SW) inputs and detects the low gain in real time
- 1 EEG channels (2 physical and 4 derived)
- Continuous impedance monitoring for quality control
- Up to 100% recording
- Ready to connect SASP standards
