Hard-to-Teach Science Concepts Susan Koba,Carol T.

Mitchell, 2011 Authors Susan Koba and Carol Mitchell introduce teachers of grades 3-5 to their conceptual framework for successful instruction of hard-to-teach science concepts. Their methodology comprises four steps: 1. engage students about their preconceptions and address their thinking; 2. target lessons to be learned; 3. determine appropriate strategies; and 4. use Standards-based teaching that builds on student understandings. The authors not only explain how to use their framework but also provide a variety of tools and examples of its application on four hard-to-teach foundational concepts: the flow of energy and matter in ecosystems; force and motion; matter and its transformation; and Earth's shape. Both preservice and inservice elementary school teachers will find this approach appealing, and the authors' engaging writing style and user-friendly tables help educators adapt the method with ease.
