The Oxford Guide to Literature in English Translation Peter France, 2000 This guide highlights the place of translation in our culture, encouraging awareness of the process of translating and the choices involved, making the translator more visible. Concentrating on major writers and works, it covers translations out of many languages from Greek to Hungarian, Korean to Turkish. For some works, e.g. Virgil's *Aeneid*, which have been much translated, the discussion is historical and critical, showing how translation has evolved over the centuries and bringing out the differences between versions. Elsewhere, with less familiar literatures, the Guide examines the extent to which translation has done justice to the range of work available.

English Historical Linguistics. Volume 2 Alexander Bergs, Laurel J. Brinton, 2012-10-01

King Alfred's Old English version of Boethius W.J. Sedgefield, *The Greek Testament, with English notes, critical, philological and exegetical ... by the Rev. S. T. Bloomfield ... Ninth edition*, 1855

Images of Rebirth Hugo Lundhaug, 2010-08-09 This book offers fresh readings of the Gospel of Philip, NHC II 3 and the Exegesis on the Soul, NHC II 6 from new theoretical and historical perspectives. Eschewing the category of Gnosticism and challenging common categorisations, the book analyses the preserved Coptic texts as coherent Christian compositions contemporary with the production and use of the Nag Hammadi Codices. A methodological framework based on Cognitive Poetics is outlined and applied to illuminate how the texts present a soteriology of transformation through religious rituals and practices using complex conceptual and intertextual blends with important polemical and paraenetic functions. The analysis highlights the use of metaphors and allusions in re-interpretations of authoritative Scripture, ritual and dogma. Complete Coptic texts and translations are included.

English mediopassive constructions Marianne Hundt, 2015-07-14 This book provides the first empirical study of the history and spread of mediopassive constructions. It investigates the productivity of the pattern, the spread of the construction in Modern English and looks into text type specific preferences for the construction. On a more abstract level, it combines the corpus-based description of mediopassive constructions with cognitive linguistic models, drawing largely on notions such as prototype, family resemblances, patch and construction. The theoretical modelling is largely based on data from real texts. These come from publicly available machine-readable corpora, text databases and a single register corpus, American mail order catalogues. The study combines the corpus-based approach with cognitive theories and is therefore of interest to both empirical and theoretical linguists.
