Allison 197essence Of Decision:

Overconfidence and War Dominic D. P. Johnson, 2009-07-01 Johnson argues that states are no more rational than people who are susceptible to exaggerated ideas of their virtue of the scope of their control and of the future By looking at such positive illusions in evolutionary biology psychology and politics of international conflict this book offers compelling insights into why states wage war

Blind Oracles Bruce Kuklick, 2013-10-24 In this trenchant analysis historian Bruce Kuklick examines the role of intellectuals in foreign policymaking He recounts the history of the development of ideas about strategy and foreign policy during a critical period in American history the era of the nuclear standoff between the United States and the Soviet Union The book looks at how the country's foremost thinkers advanced their ideas during this time of United States expansionism a period that culminated in the Vietnam War and d tente with the Soviets Beginning with George Kennan after World War II and concluding with Henry Kissinger and the Vietnam War Kuklick examines the role of both institutional policymakers such as those at The Rand Corporation and Harvard's Kennedy School and individual thinkers including Paul Nitze McGeorge Bundy and Walt Rostow Kuklick contends that the figures having the most influence on American strategy Kissinger for example clearly understood the way politics and the exercise of power affects policymaking Other brilliant thinkers on the other hand often played a minor role providing at best a rationale for policies adopted for political reasons At a time when the role of the neoconservatives influence over American foreign policy is a subject of intense debate this book offers important insight into the function of intellectuals in foreign policymaking

The Cold War J.P.D. Dunbabin, 2014-01-14 The Cold War offers a brief but detailed treatment of one of the most complex eras of the 20th Century In this fully revised second edition J P D Dunbabin drawing on international scholarship and using much new material from communist sources describes a world in which covert operations could be as important as outright diplomacy soft power as influential as hard and in which competing ideologies ruled the hearts as much as the heads of the leaders in power Dunbabin's account is global in scope taking into account the importance of players beyond the superpowers and shedding light on the proxy conflicts such as those in Africa and the Middle East that if not caused by the continuing stalemate between the great powers were used as weapons within it

Leaders and Their Followers in a Dangerous World Jerrold M. Post, 2004 Post is a pioneer in the field of political personality profiling He may be the only psychiatrist who has specialized in the self esteem problems of both Osama bin Laden and Saddam Hussein The New Yorker Policy specialists and academic scholars have long agreed that for U S leaders to deal effectively with other actors in the international arena they need images of their

adversaries Leaders must try to see events and indeed their own behavior from the perspective of opponents Faulty images are a source of misperceptions and miscalculations that have often led to major errors in policy avoidable catastrophes and missed opportunities History supplies all too many examples from the Foreword What impels leaders to lead and followers to follow How did Osama bin Laden the son of a multibillionaire construction magnate in Saudi Arabia become the world's number one terrorist What are the psychological foundations of man's inhumanity to man ethnic cleansing and genocide Jerrold M Post contends that such questions can be answered only through an understanding of the psychological foundations of leader personality and political behavior Post was founding director of the Center for the Analysis of Personality and Political Behavior for the CIA He developed the political personality profiles of Menachem Begin and Anwar Sadat for President Jimmy Carter's use at the Camp David talks and initiated the U S government's research program on the psychology of political terrorism He was awarded the Intelligence Medal of Merit in 1979 for his leadership of the center In this book he draws on psychological and personality theories as well as interviews with individual terrorists and those who have interacted with particular leaders to discuss a range of issues the effects of illness and age on a leader's political behavior narcissism and the relationship between followers and a charismatic leader the impact of crisis induced stress on policymakers the mind of the terrorist with a consideration of killing in the name of God and the need for enemies and the rise of ethnic conflict and terrorism in the post Cold War environment The leaders he discusses include Fidel Castro Osama bin Laden Saddam Hussein Kim Jong Il and Slobodan Milosevic

O'Toole, 2014-11-11 A splendidly written impeccably researched and perfectly fascinating look at clandestine operations from colonial times to the Cuban Missile Crisis The Washington Post Book World We've always depended on intelligence gathering to drive foreign policy in peacetime and command decision in war but that work has often taken place in the shadows Honorable Treachery fills in these details in our national history dramatically recounting every important intelligence operation from our nation's birth into the early 1960s Among numerous other stories the book recounts how in 1795 President Washington mounted a covert operation to ransom

American hostages in the Middle East how in 1897 Kaiser Wilhelm II s plans for an invasion of the United States were stopped by the director of the US Office of Naval Intelligence and how President Woodrow Wilson created a secret agency called the Inquiry to compile intelligence for the peace negotiations at the end of World War I From a Pulitzer Prize finalist who himself worked for the CIA Honorable Treachery puts America s use of covert intelligence into a broader historical context providing a unique insight into the secret workings of our country O Toole offers fascinating information generally unrecorded in traditional diplomatic and military histories Library Journal

Constructing Cassandra Milo Jones,Philippe Silberzahn,2013-08-21 Constructing Cassandra analyzes the intelligence failures at the CIA that resulted in four key strategic surprises experienced by the US the Cuban Missile Crisis in 1962 the Iranian revolution of 1978 the collapse of the USSR in 1991 and the 9 11 terrorist attacks surprises still play out today in U S policy Although there has been no shortage of studies exploring how intelligence failures can happen none of them have been able to provide a unified understanding of the phenomenon To correct that omission this book brings culture and identity to the foreground to present a unified model of strategic surprise one that focuses on the internal make up the CIA and takes seriously those Cassandras who offered warnings but were ignored This systematic exploration of the sources of the CIA s intelligence failures points to ways to prevent future strategic surprises
