Maureen G. Johnson, 1972 A catalog of location geology and production with lists of annotated references pertaining to the placer districts **Mine Wastes** Bernd Lottermoser, 2013-04-18 This book is not designed to be an exhaustive work on mine wastes It aims to serve undergraduate students who wish to gain an overview and an understanding of wastes produced in the mineral industry An introductory textbook addressing the science of such wastes is not available to students despite the importance of the mineral industry as a resource wealth and job provider Also the growing importance of the topics mine wastes mine site pollution and mine site rehabilitation in universities research or organizations and industry requires a textbook suitable for undergraduate students Until recently undergraduate earth science courses tended to follow rather classical lines focused on the teaching of palaeontology crystallography mineralogy petrology stratigraphy sedimentology structural geology and ore deposit geology However today and in the future earth science teachers and students also need to

be familiar with other subject areas In particular earth science curriculums need to address land and water degradation as well as rehabilitation issues These topics are becoming more important to society and an increasing number of earth science students are pursuing career paths in this sector Mine site rehabilitation and mine waste science are examples of newly emerging disciplines This book has arisen out of teaching mine waste science to undergraduate and graduate science students and the frustration at having no appropriate text which documents the scientific fundamentals of such wastes

Alluvial Prospecting and Mining S. V. Griffith, 2013-10-02 Alluvial Prospecting and Mining Second Revised Edition focuses on the emergence of improved mining techniques and methods used in the excavation of alluvial deposits The book first offers information on the prospecting methods sampling and valuation Discussions focus on preliminary systematic prospecting drilling in difficult ground supervision of drilling rate of excavation pitting and drilling compared sampling of bore holes and calculation of reserves The publication then examines water supply including earth dams spillways leats ditches or canals and design of pipelines The manuscript ponders on sluicing and dry concentration of minerals Topics include rock pavements undercurrents false bottoms glean up tailings ground sluicing water required exploitation of plants electrostatic separation and high intensity magnetic separators The book also reviews forward preparation of overburden hydraulic mining and gravel pumping The publication is a dependable reference for miners and readers interested in alluvial prospecting and mining

Formation of Gold Deposits Neil Phillips, 2022-06-16 This book addresses the origin of gold deposits to answer questions of science and curiosity These answers contribute in turn to the improved exploration and mining of gold Initially there is a summary of the methods used to address the genesis of gold deposits including some of the essential science and concepts Five basic observations follow that apply to many gold deposits and need to be considered in any genetic ideas Magmatic processes enriching gold are discussed followed by the role of aqueous fluids during gold deposit formation at elevated temperatures and pressures Modifying effects after deposit formation include high grade metamorphism retrogression weathering and erosion The main types of gold deposits are then explained within the spectrum of viable genetic ideas with informal names for these examples that include gold only gold plus Carlin slate belt epithermal porphyry iron oxide copper gold and Archean greenstone Case histories are included in which the role of gold geology contributed directly to discoveries one example is at the province scale and another at the goldfield scale Unlike other books on the subject this one addresses virtually all gold deposit types rather than focusing on one type in isolation The primary readership includes industry geologists senior undergraduates postgraduates and those with some knowledge of science and an interest in the gold industry
