The Far Shore Mitchell Ginsberg, 1996 We have all had glimpses from the far shore where with openness we experience and are fully in touch with ourselves From the far shore we see with honesty clarity and true acceptance The Far Shore offers reflections on this experience in everyday life and is addressed to all who are drawn to the path of awareness and compassion

Joyce Wieland's The Far Shore Johanne Sloan, 2010-01-01 *The Far Shore* 1976 made

under the direction of celebrated visual artist and experimental filmmaker Joyce Wieland is one of Canada's most innovative contributions to cinema. The film borrows elements from the life of Canadian painter Tom Thomson who is represented by the character of Tom McLeod. The main character however is not Tom but the fictional creation of Eulalie de Chicoutimi, the married Québécoise woman who loves him. Using Eulalie's perspective, Wieland was able to re-frame Thomson's life and story as a romantic melodrama while infusing it with subversive commentary on gender, nature, and nationalism, and ultimately on the value of art. Here, Wieland specialist Johanne Sloan offers a fascinating new perspective on *The Far Shore*, making it more accessible by discussing Wieland's utopian fusion of art and politics, the importance of landscape within Canadian culture, and the on-going struggle over the meaning of the natural environment.

On Christendom's Far Shore James Larry Hood, 2013-12-18 *On Christendom's Far Shore* describes and explains American society by first illuminating its foundational stones: the traditional Western Judeo-Christian faith in God and the West's once common understanding of the natural order and the nature and destiny of man. It explores the biblical concepts of faith, paradox, tragedy, and grace; time, gender, relations, love, work, play, individual and communal responsibilities, freedom, and the Kingdom of Heaven. The book illustrates how these ideas and values underlie more specifically American values and American social and governmental patterns and structures, such as the pursuit of knowledge and wisdom, the creation of families and larger social groups and communities, the mentoring of future generations, and people's understanding of self-governance and how to relate to other nations. *On Christendom's Far Shore* depicts the present as a time of twilight with the United States caught up in a cataclysmic clash between a traditional understanding of man and of a God-centered universe and a post-modern, existential, man-centered, multicultural worldview that rejects the old values and structures and determinedly seeks a vast restructuring of the nation's social and political order and character.

Global Strategy Andrew Inkpen, Kannan Ramaswamy, 2005-11-24 There are few industries if any untouched by global competitive forces. Firms and countries long accustomed to dominance in their respective international markets must now reckon with aggressive and innovative competitors from all corners of the world. As the cross-border flow of people, knowledge, ideas, products, services, and management practices accelerates, the notion of home-based advantage is becoming weaker. Unlike their domestic counterparts, firms competing across borders must deal with differences in political, legal, financial, cultural, governance, and macroeconomic contexts. These contextual differences shape competition in international strategy and make the study of international strategy more than just a simple extension of classic strategic analysis. Global Strategy deals with the question of how firms can compete in a global environment. Andrew Inkpen and Kannan Ramaswamy examine the issues considered central to the study of strategic management in a global context, such as the nature of global advantage, strategic alliances, competing in emerging markets, international corporate governance, global knowledge management, and ethical issues in international business. Much has been written about the relevance of global, regional, and domestic strategies to counter competition from overseas and as a means to enter foreign

markets However global Strategy takes a broader view organizing itself around a set of strategic management issues that arise specifically because a firm is international While there is obviously some overlap between domestic strategic management and global strategic management it is Inkpen and Ramaswamy's contention that the differences between domestic and global strategy warrant specific attention By integrating academic research with practical examples and case studies they inform students and managers of global business about a diverse set of important strategic issues

The Human Shore John R. Gillis, 2012-10-17 Since before recorded history people have congregated near water But as growing populations around the globe continue to flow toward the coasts on an unprecedented scale and climate change raises water levels our relationship to the sea has begun to take on new and potentially catastrophic dimensions The latest generation of coastal dwellers lives largely in ignorance of the history of those who came before them the natural environment and the need to live sustainably on the world's shores Humanity has forgotten how to live with the oceans In *The Human Shore* a magisterial account of 100 000 years of seaside civilization John R Gillis recovers the coastal experience from its origins among the people who dwelled along the African shore to the bustle and glitz of today's megacities and beach resorts He takes readers from discussion of the possible coastal location of the Garden of Eden to the ancient communities that have existed along beaches bays and bayous since the beginning of human society to the crucial role played by coasts during the age of discovery and empire An account of the mass movement of whole populations to the coasts in the last half century brings the story of coastal life into the present Along the way Gillis addresses humankind's changing relationship to the sea from an environmental perspective laying out the history of the making and remaking of coastal landscapes the creation of ports the draining of wetlands the introduction and extinction of marine animals and the invention of the beach while giving us a global understanding of our relationship to the water Learned and deeply personal *The Human Shore* is more than a history it is the story of a space that has been central to the attitudes plans and existence of those who live and dream at land's end
