Preservation Wayne J. Caldwell, Stew Hilts, Bronwynne Wilton, 2017-03-22 As land is lost to urban sprawl and other non farm activity our ability to produce food is diminished and options for future food production are limited Farmland preservation speaks to the need to preserve the agricultural land base for future generations The need for protection is driven by uncertainty caused by climate change population growth food security energy availability and other local and global factors This uncertainty means that there is an ever growing responsibility to ensure that the actions of today do not compromise the needs of future generations This second edition of Farmland Preservation provides a range of views and case studies from across Canada the United States and beyond Its fourteen essays are intended to help the reader understand the importance of the issue and the potential for applying new approaches to agricultural protection policy tools and initiatives

the coexistence of agricultural land and unconventional gas namely adaptive management precautionary and finally statism It offers a timely and topical approach to socio legal natural resource governance theory based on the participation transparency and empowerment for agricultural landholders examining how differing frameworks such as the collective bargaining framework can create equitable and sustainable contractual arrangements with unconventional gas companies
