

BEYOND TESTS: ALTERNATIVES IN ASSESSMENT

In the public eye, tests have acquired an aura of infallibility in our culture of mass producing everything, including the education of school children. Everyone wants a test for everything, especially if the test is cheap, quickly administered, and scored instantaneously. But we saw in Chapter 4 that while the standardized test industry has become a powerful juggernaut of influence on decisions about people's lives, it also has come under severe criticism from the public (Kohn, 2000). A more balanced viewpoint is offered by Bailey (1998, p. 204): "One of the disturbing things about tests is the extent to which many people accept the results uncritically, while others believe that all testing is invidious. But tests are simply measurement tools: It is the use to which we put their results that can be appropriate or inappropriate."

It is clear by now that tests are one of a number of possible types of assessment. In Chapter 1, an important distinction was made between testing and assessing. Tests are formal procedures, usually administered within strict time limitations, to sample the performance of a test-taker in a specified domain. Assessment connotes a much broader concept in that most of the time when teachers are teaching, they are also assessing. Assessment includes all occasions from informal impromptu observations and comments up to and including tests.

Early in the decade of the 1990s, in a culture of rebellion against the notion that all people and all skills could be measured by traditional tests, a novel concept emerged that began to be labeled "alternative" assessment. As teachers and students were becoming aware of the shortcomings of standardized tests, "an alternative to standardized testing and all the problems found with such testing" (Huerta-Macias, 1995, p. 8) was proposed. That proposal was to assemble additional measures of students—portfolios, journals, observations, self-assessments, peer-assessments, and the like—in an effort to triangulate data about students. For some, such alternatives held "ethical potential" (Lynch, 2001, p. 228) in their promotion of fairness and the balance of power relationships in the classroom.

Why, then, should we even refer to the notion of "alternative" when assessment already encompasses such a range of possibilities? This was the question to which Brown and Hudson (1998) responded in a *TESOL Quarterly* article. They noted that
