SHE Purva Grover, 2021-08-12 Among the many things I don t understand most are feminine This work is a written extension of the babble we re fed and that we feed of It is not an attempt to connect any dots Its subjects are women I know It s not a case of pure coincidence but pure intention No research has gone into this piece of writing unless you consider banter over drinks on long distance phone calls or by water coolers so I don t wish to expose the individuals who confided in me or embarrass myself so I d like to state that it is a work of fiction heavily inspired by real lives Even when I talk about myself remember I could just be making up some bits I am a storyteller after all Reading it won t make you wiser as writing it has had no such effect on me No bra burning issues will be discussed in the following pages as this is not the place for it and we need to respect that If you get offended easily or dislike unwanted advice now is the time you put down the book The rest of you join me I hope to make you suffer with me Feel free to observe absorb judge and compare Or not P S I m not a funny person so if you find parts of the script laugh worthy it is your sense of humour at work not mine I expect to make no difference in your lives If you do happen to learn or unlearn something don t hold me responsible for it Nutrition Peter McDonald, J. F. D. Greenhalgh, R. Edwards, C. A. Morgan, Liam Sinclair, Robert Wilkinson, 2022 Recent research in the field of animal science has focused on advances in molecular biology particularly in the study of gene expression epigenetics and gene editing and exciting advances have been made However knowledge of animal biochemistry and nutrition is still essential if we are to understand the significance and efficient application of these new findings to further improve animal production health and welfare The application of research and advice in animal nutrition continues to be at the centre of efficient animal production Research in dog and cat nutrition has also progressed since the last edition and information in this area has been expanded in this new edition. We have retained the early chapters on basic food chemistry and animal biochemistry to provide a quick reference to questions pertaining to the discipline of nutrition chemistry in later parts of the book We have also taken the opportunity to introduce nutritional topics related to molecular biology and the environment Each chapter now has a set of questions to assist with revision of the chapter topic and the Appendix tables have been revised where new data are available Two significant events have occurred since the last edition In 2016 the British Society of Animal Science recognised the 50th anniversary of the publication of the first edition of Animal Nutrition by awarding framed certificates of congratulation to the original three authors Peter McDonald James Greenhalgh and Alun Edwards Then in 2018 came the sad news that Peter McDonald had died Although Peter had not been actively involved in the production of recent editions of the book he had always shown great interest in its progress Fittingly Peter's funeral service was conducted by another eminent animal nutritionist Rev Dr Neville Suttle The production of this edition was assisted by comments and suggestions received from reviewers and we welcome comments from readers As with previous editions we are grateful to colleagues for their helpful discussions *Principles of Companion Animal Nutrition*
