Annual Edition Physical Anthropology 114:

American Journal of Physical Anthropology, 2001 Bibliography in physical anthropology 1942 43 in Dec issue

Histories of American Physical Anthropology in the Twentieth Century Michael A. Little, Kenneth A. R.

Kennedy, 2010-01-01 Histories of American Physical Anthropology in the Twentieth Century chronicles the history of physical anthropology or as it is now known biological anthropology from its professional origins in the late 1800 up to its modern transformation in the late 1900s In this edited volume 13 contributors trace the development of people ideas traditions and organizations that contributed to the advancement of this branch of anthropology that focuses today on human variation and human evolution Designed for upper level undergraduate students graduate students and professional biological anthropologists this book provides a brief and accessible history of the biobehavioral side of anthropology in America

Bioarchaeology Clark Spencer Larsen, 2015-03-30 A synthetic treatment of the study of human remains from

archaeological contexts for current and future generations of bioarchaeologists **The Body as Material Culture** Joanna R. Sofaer, 2006-02-16 Bodies intrigue us They promise windows into the past that other archaeological finds cannot by bringing us literally face to face with history Yet the body is also highly contested Archaeological bodies are studied through two contrasting perspectives that sit on different sides of a disciplinary divide On one hand lie science based osteoarchaeological approaches On the other lie understandings derived from recent developments in social theory that increasingly view the body as a social construction Through a close examination of disciplinary practice Joanna Sofaer highlights the tensions and possibilities offered by one particular kind of archaeological body the human skeleton with particular regard to the study of gender and age Using a range of examples she argues for reassessment of the role of the skeletal body in archaeological practice and develops a theoretical framework for bioarchaeology based on the materiality and historicity of human remains **The Evolution of Mind** Steven W. Gangestad, Jeffry A. Simpson, 2016-01-26 In the past

two decades an explosion of research has generated many compelling insights as well as hotly debated controversies about the evolutionary bases of human nature This important volume brings together leading proponents of different theoretical and methodological perspectives to provide a balanced look at 12 key questions at the core of the field today In 43 concise accessible chapters followed by an integrative conclusion the contributors present viewpoints informed by human behavioral ecology evolutionary psychology and gene culture coevolutionary approaches Topics include the strengths and limitations of different methodologies metatheoretical issues and debates concerning the evolution of the human brain intellectual abilities culture and sexual behavior **The Aesthetics of Emotion** Gerald C. Cupchik, 2016-07-28 Argues that relations between

mind and body are analogous to those between subject matter and style in art **The Making of Mississippian Tradition** Christina M. Friberg, 2020-10-06 Christina Friberg investigates the influence of Cahokia the largest city of North America s Mississippian culture between AD 1050 and 1350 on smaller communities throughout the midcontinent This book offers a

new more nuanced interpretation of how and why Mississippian lifeways developed

Evolution of Mind, Brain, and Culture Gary Hatfield, Holly Pittman, 2013-05-28 Descartes boldly claimed I think therefore I am But one might well ask Why do we think How When and why did our human ancestors develop language and culture In other words what makes the human mind human Evolution of Mind Brain and Culture offers a comprehensive and scientific investigation of these perennial questions Fourteen essays bring together the work of archaeologists cultural and physical anthropologists psychologists philosophers geneticists a neuroscientist and an environmental scientist to explore the evolution of the human mind the brain and the human capacity for culture The volume represents and critically engages major theoretical approaches including Donald s stage theory Mithen s cathedral model Tomasello s joint intentionality and Boyd and Richerson s modeling of the evolution of culture in relation to climate change No recent publication combines this breadth of evidential and theoretical perspective The essays range in topic from the macroscopic the evolution of social cooperation to the microscopic examining genetic data to infer evolutions in brain structure and function and from the ancient paleoanthropological reconstructions of hominin cognitive abilities to the modern including modern hominin s similarities to our primate cousins Considered together these essays constitute a fascinating detailed look at what makes us human PMIRC volume 5

The Medicalized Body and Anesthetic Culture Brent Dean Robbins, 2018-04-03 This book examines how modern medicine s mechanistic conception of the body has become a defense mechanism to cope with death anxiety Robbins draws from research on the phenomenology of the body the history of cadaver dissection and empirical research in terror management theory to highlight how medical culture operates as an agent which promotes anesthetic consciousness as a habit of perception In short modern medicine s comportment toward the cadaver promotes the suppression of the memory of the person who donated their body This suppression of the memorial body comes at the price of concealing the lived experiential body of patients in medical practice Robbins argues that this style of coping has influenced Western culture and has helped to foster maladaptive patterns of perception associated with experiential avoidance diminished empathy death denial and the dysregulation of emotion

Tool Use in Animals Crickette M. Sanz, Josep Call, Christophe Boesch, 2013-03-07 The last decade has witnessed remarkable discoveries and advances in our understanding of the tool using behaviour of animals Wild populations of capuchin monkeys have been observed to crack open nuts with stone tools similar to the skills of chimpanzees and humans Corvids have been observed to use and make tools that rival in complexity the behaviours exhibited by the great apes Excavations of the nut cracking sites of chimpanzees have been dated to around 4 5 thousand years ago Tool Use in Animals collates these and many more contributions by leading scholars in psychology biology and anthropology along with supplementary online materials into a comprehensive assessment of the cognitive abilities and environmental forces shaping these behaviours in taxa as distantly related as primates and corvids
