eLearning for Quality Teaching in Higher Education Nan Yang, 2020-04-20 This book explores the impact of eLearning on the quality of teaching in higher education focusing on three main issues university teachers perception of quality teaching their strategies for achieving quality

teaching in practice and interventions that design and implement online collaborative activities in a large class The book argues that if eLearning targets the real problems in practice and is appropriately designed and implemented it can improve the teaching quality at universities It also demonstrates the complexity of teachers perception of quality teaching and contextual factors that affect teaching practice and quality Further it explores university teachers perception of quality teaching in Italy the UK and China an aspect that is rarely addressed in the literature and reveals why the impact of ICTs on university teaching is not as great as in other fields by explaining the issues that threaten the quality of day to day teaching Lastly it confirms that traditional lecturing combined with online collaborative activities improves the quality of teaching compared to traditional lecturing alone As such this book is a necessary and important resource for the research community

Learning Factories Eberhard Abele,Joachim Metternich,Michael Tisch,2018-10-10 This book presents the state of the art of learning factories It outlines the motivations historic background and the didactic foundations of learning factories Definitions of the term learning factory and a corresponding morphological model are provided as well as a detailed overview of existing learning factory approaches in industry and academia showing the broad range of different applications and varying contents Learning factory best practice examples are presented in detailed and structured manner The state of the art of learning factories curricula design and their use to enhance learning and research as well as potentials and limitations are presented Further research priorities and innovative learning factory concepts to overcome current barriers are offered While today numerous learning factories have been built in industry big automotive companies pharma companies etc and academia in the last decades a comprehensive handbook for the scientific community and practitioners alike is still missing The book addresses therefore both researchers in production related areas that want to conduct industry relevant research and education as well as managers and engineers in industry who are searching for an effective way to train their employees In addition to this the learning factory concept is also regarded as an innovative learning concept in the field of didactics
