There Is No One Way to Teach Math Henri Picciotto, Robin Pemantle, 2024-09-10. A collaboration between a seasoned math teacher and a research mathematician, this resource offers balanced instructional ideas based on student intellectual engagement and skilled teacher leadership. It is solidly grounded in many areas of classroom practice but rather than serving as a prescriptive how-to manual, the authors invite reflection and discussion across classrooms and math departments much in the way you would share ideas in the teachers' lounge or across the table at a conference. Chapters offer practical suggestions and concrete examples to teachers of grades 6-12 on just about every aspect of the job: manipulatives, technology, lesson planning, group work, classroom discussion, and more. In opposition to the idea of a one-size-fits-all curriculum, the authors explain how to integrate teaching techniques, formal and informal, student-centered and teacher-led, experiential and rigorous. Chapters also include vignettes as well as many links to curricular materials. Ideal for math educators of grades 6-12, this book is both comprehensive in its strategies and sensitive to the complexities of teaching. For these reasons, math departments, coaches, teacher leaders, and faculty at other levels can also easily reference its content where relevant. This book offers multiple entry points for teachers and departments to discuss and enhance their practice, making it essential reading for any math educator or professional development opportunity.
