The Routledge Handbook of Poverty in the Global South Rajendra Baikady, John Gal, Varoshini Nadesan, Sajid S.M., Gao Jianguo, 2023-12-01 This handbook initiates fresh debates on poverty and its impact in a constantly changing Global South society. It studies the concept, theories and causes of poverty as well as the design and delivery of social welfare policies related to specific groups such as women, children and the elderly. The chapters are theoretical, evidence-based and empirical in nature and bring together a holistic understanding of social problems and issues in developing countries. The volume brings together researchers, educators and practitioners from across the globe to develop a hands-on reference work that will be requisite for several social science disciplines concerned with poverty and the welfare of poor people. The first of its kind, the handbook will be indispensable for scholars and researchers of development studies, economics, social work, political studies, poverty studies, population and demographic studies, sociology, social anthropology, public policy and political economy, especially those concerned with the Global South.

The Routledge Handbook of Human Research Ethics and Integrity in Australia Bruce M. Smyth, Michael A. Martin, Mandy Downing, 2024-10-23 The Routledge Handbook of Human Research Ethics and Integrity in Australia highlights why it is important to look at the subject of human research ethics and integrity within the Australian context and what the Australian perspective can offer to all researchers in the social sciences and humanities globally. Australia has one of the world's most rigorous ethics governance frameworks. This edited collection comprises 35 chapters compiled with the aim of presenting human research ethics and integrity in a way that can be readily understood and applied by undergraduate and postgraduate students, early career and seasoned researchers, Human Research Ethics Committee members and those who work in the administration of human research ethics. Chapters that focus on research ethics with Aboriginal and Torres Strait Islander people are likely to be of great interest to an international audience interested in Indigenous research ethics more broadly. This collection will act as a prism through which ethical first principles can be seen afresh from the vista of contemporary Australian research ethics frameworks. The issues raised in this collection are likely to resonate beyond the Australian context and will speak to researchers and educators in a variety of settings who find themselves grappling with thorny ethical issues ranging from the rapid evolution of data security and privacy concerns to research about cultural heritage and ethical approaches to Indigenous cultural and intellectual property.

falls of the Powow River in the Millyard or listen to a concert in the amphitheater to experience Amesbury's charm. Despite a 1996 vote changing the town into a city, this great community retains the same small town feel it has held for so many years.

Silver-Based Antimicrobials Raymond J. Turner, 2021-02-22 There is some talk about an antibiotic Armageddon due to quickly developing resistance towards commercially available antibiotics. For the most part, the classical antibiotic pipeline has dried up, and antibiotic resistance to any new drugs quickly develops. It is here that metal-based antimicrobials can step forward as possible solutions in this antimicrobial resistance era. The biological targets of metal atoms are more diverse, thus making it more difficult for bacteria to develop resistance compared with classical antibiotics. The metal silver has been used since antiquity for wound healing and water purification. At present, it is the most prevalent antimicrobial metal used in healthcare industry and consumer products. Silver is being used in the form of ionic salt colloids or in specific nanomaterials, and as described in this book, it can be applied as mixtures with other antimicrobials or coating composites. The different formulations are explored for their efficacy against a variety of problems related to agricultural and medical infections. Whilst by no means exhaustive, this book nicely highlights the present directions in silver-based antimicrobial research and antimicrobial formulation development. The chapters have been organized from a general introductory review to approaches of mixing other antimicrobials and materials to enhance silver performance. This is followed by synthetic approaches. First are biogenic, sometimes called green or eco-friendly approaches, followed by advanced physical/chemical synthetic approaches. The book ends with an overview of applications through a review of patents over the past 10 years.

Agriculture for improved nutrition: Seizing the momentum Fan, Shenggen, Yosef, Sivan, Pandya-Lorch, Rajul, 2019-02-28 Agriculture's vast potential to improve nutrition is just beginning to be tapped. New ideas, research, and initiatives developed over the past decade have created an opportunity for reimagining and redesigning agricultural and food systems for the benefit of nutrition. To support this transformation, the book reviews the latest findings, results from on-the-ground programs and interventions, and recent policy experiences from countries around the world that are bringing the agriculture and nutrition sectors closer together. Drawing on IFPRI's own work and that of the growing agriculture nutrition community, this book strengthens the evidence base for and expands our vision of how agriculture can contribute to nutrition. Chapters cover an array of issues that link agriculture and nutrition, including food value chains, nutrition-sensitive programs and policies, government policies, and private sector investments. By highlighting both achievements and setbacks, *Agriculture for Improved Nutrition* seeks to inspire those who want to scale up successes that can transform food systems and improve the nutrition of billions of people.
