British Colonial Investment in Colonial N.S.W. 1788-1850 Gordon W. Beckett, 2013 The traditional recounting of early Australian Economic History is that Britain decided to settle the continent for strategic advantages and as a source of raw materials for its industry and as an outlet for its trading and the transfer of resources a takeover by the new economic managers The official intention of settling the colony was for peaceful co operative economic development of the new land beneficial to British traditional interests and not intended to undermine or engage in war with the native population and to share what food resources were naturally available The gulf between the two societies was too large to be bridged and the British settlement succeeded while the ancient society was destroyed The destruction of traditional Aboriginal society was recognized by depopulation from an accepted population of about 1 million in 1788 to 250 000 by 1848 whilst an estimated 50% of Aboriginal resources were absorbed by white settlers between 1788 and 1809 The extent and content of British Colonial Investment is discussed as are topics such as the role of Immigration and Foreign Investment the reasons for the colony and the highlights of the British rule in the economy and the colonial economic experiment undertaken by Macquarie

Gold Wars Kelly Mitchell,2013-10-22 Gold Wars Battle for the Global Economy addresses the grotesque growing and unsustainable imbalances in the financial system As gold is the barometer of systemic ills a war on gold to drive down its price is taking place to hide the negative impacts of fiat currency shadow banking and central banking on the global financial system Starting with an introductory discussion on the nature of money and the bizarre fractional reserve structure currently in place Mitchell moves on to address the massive but little known systemic pivot point the Petrodollar standard Tying dollars to oil this mechanism undergirds the dollar s reserve status But soon it will fail with paradigm shifting consequences Next Mitchell addresses the twins of shadow banking and central banking with a quick interlude to look at the traits of physical gold Then with the stage set and the distortions corruptions and levers of power in better view he examines a few historical precedents and likely outcomes through deflationary inflationary effects and their combinations Gold Wars features a detailed breakdown of the gross manipulations in the gold market from nonexistent paper gold smackdowns high frequency trading and ETF s to Central Bank games like swapping leasing shell accounting midnight raids clandestine gold movements and regulatory attacks on investors Mitchell offers a prediction of the results for the gold market when the manipulation fails paper and physical prices will separate with the physical selling for multiples of paper Similarly silver with its own unique characteristics for industry and investment is also targeted as a potential refuge for flight from paper though strangely above ground gold is now more plentiful than silver Add to this a silver short position rolling from one institution to another as each fails a 4 year foot dragging investigation into market fraud and a class action suit for manipulation and the market has a recipe for a pressure cooker at maximum Western banks lacking the gold to cover their obligations will eventually declare a force majeure an event supposedly the result of the elements of nature as opposed to one caused by human behavior as a pretext for settling their obligations in increasingly valueless paper Where is the resistance to this distortion and corruption of value Power is flowing East as China and Russia have drawn in massive amounts of gold while denyin
