Am Gov 2015 2016:

Old Age Population in India Subhabrata Dutta and Ritwika Rajendra, 2023-01-01 Population ageing is seen as a major force transforming relationships at various levels in the health and social care system in the economy and in society as a whole. Accordingly, the phenomenon of ageing population is becoming a major concern for the policy makers all over the world for both developed and developing nations during last three decades. In India, the size of the elderly population, i.e. persons above the age of 60 years, is constantly growing, and even the percentage of persons above age 80 is going up over the years, and this may pose mounting pressures on various socio-economic fronts including pension outlays, healthcare expenditures, fiscal discipline, savings levels, etc. There is an emerging need to pay greater attention to ageing-related issues and to promote holistic policies and programmes for dealing with the ageing society. This book consists of 15 chapters addressing these issues and problems along with care and NGOs' support for the elderly and brought suggestion plans for the government.

Anesthesiology J. G. Reves,Sheila Ryan Barnett,Julie R. McSwain,G. Alec Rooke,2017-10-27 Surgical and anesthetic techniques have evolved to allow a growing number of older adults to undergo surgery and current estimates are that 50% of Americans over the age of 65 years old will have an operation However as the knowledge regarding perioperative care of the elderly surgical patient grows so do the questions In this edition each chapter includes a section entitled Gaps in Our Knowledge meant to highlight areas in which research is needed as well as hopefully inspire readers to begin solving some of these questions themselves Building upon the strong foundation of the first two editions Geriatric Anesthesiology 3rd edition also assembles the most up to date information in geriatric anesthesia and provides anesthesiologists with important new developments Topics covered include several new chapters that reflect the evolution of multidisciplinary geriatric care throughout the perioperative continuum as well as the growing body of literature related to prehabilitation In addition

discussion of the surgeon's perspective and geriatrician's perspective on surgery in the geriatric population is covered as well as the systematic physiologic changes associated with aging and the pharmacologic considerations for the geriatric patient undergoing procedures. Finally, the last section discusses postoperative care specific to the geriatric population including acute pain management, ICU management, recent evidence, and up-to-date practice regarding delirium and postoperative cognitive dysfunction and palliative care.

Mediterranean Diet Donato F. Romagnolo, Ornella I. Selmin, 2016-02-29 This text is an especially timely new text as the number of studies focusing on the impact of the Mediterranean diet on disease prevention increases every year. The fundamental question addressed in this text is how food components and behavior of the Mediterranean diet reduce the risk of chronic diseases. In depth, chapters provide an overview of preclinical and clinical studies on Mediterranean dietary patterns, food components and lifestyle, and their impact on health and disease. Large-scale omic approaches are highlighted to educate the reader about the molecular mechanisms through which specific components of the Mediterranean diet improves health and the opportunities and challenges for translating into practice the food recommendations of the Mediterranean pyramid. The volume concludes with information about the nutritional adequacy of Mediterranean foods and provides selected recipes. **Mediterranean Diet: Impact on Health and Disease** will be of great interest to students, clinicians, and scientists engaged in promoting health through nutrition and physical activity.

Chest Wall Deformities Amulya K.

Saxena,2017-06-07 Chest wall deformities encompass a variety of congenital and acquired pathologies that affect the pediatric and the adult population This comprehensive work offers detailed state of the art information on the changing paradigms in ultrastructural evaluation diagnosis clinical investigation and treatment and reflects the shift towards conservative and minimally invasive treatment options The combination of concise descriptions and high quality images will provide the reader with a clear understanding of all relevant concepts Diagnostic and imaging modalities are analysed in depth and surgical procedures are explained step by step with the aid of clear informative illustrations Experts in the management of chest wall deformities from all over the world have contributed their experiences and approaches making this a unique textbook in the field and an ideal reference work for clinicians and surgeons **Menstruation Matters**

Bridget J. Crawford,Emily Gold Waldman,2022-06-21 In this book the authors explore the many ways that menstruation makes a difference in law and life in the United States The book looks at cultural attitudes toward menstruation the tampon tax the need for accessible products in schools prisons and other public buildings employment discrimination matters health and environmental concerns the complex market for menstrual products and the ways similar issues at the intersection of menstruation and law arise in other countries This book asks what the law currently says about menstruation spoiler alert not much at least not explicitly and lays out concrete suggestions for legal reform The authors aim to transform the law and society so that every person can participate fully in all aspects of public and private life without regard to the involuntary biological process of menstruation Geriatric Medicine Michael R. Wasserman,Debra Bakerjian,Sunny Linnebur,Sharon Brangman,Matteo Cesari,Sonja Rosen,2024-02-19 Both volumes sold as a combined set for a one time purchase Older adults represent the most rapidly growing demographic in the U S and in many developed countries around the world The field of geriatric medicine is still relatively young and is only recently seeing a significant increase in peer reviewed literature Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars year in the US How our healthcare system cares for older adults and how those older adults navigate an increasingly complex system is of the utmost importance According to the Institute of Medicine physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life It is essential that physicians nurse practitioners physician assistants pharmacists social workers and other health care professionals all be knowledgeable about the geriatric approach to care Geriatric medicine varies from most other fields in medicine While many specialties function on the basis of evidence based literature geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants Geriatricians are used to caring for 90 year olds with multiple chronic illnesses Their variable physiology leads to uncertain responses to pharmacotherapy and their personal goals and wishes need to be incorporated into any plan of care Practicing geriatric medicine requires the ability to see patterns But it goes one

step further as the rules are constantly in flux Every patient is an individual with particular needs and goals In order to provide true person centered care to older adults one has to incorporate these factors into the decision making process The proposed handbook is designed to present a comprehensive and state of the art update that incorporates existing literature with clinical experience Basic science and the physiology of aging create a background but are not the main focus This is because every chapter has been written through the lens of person centered care This book is about focusing on what matters to the person and how that is not always about pathology and physiology The reader generally will not find simple solutions to symptoms diseases and syndromes In fact the key to caring for geriatric patients is the ability to think both critically and divergently at the same time Geriatrics encompasses multiple disciplines and spans all of the subspecialties It requires knowledge of working within an interdisciplinary team It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary And most of all it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care This book aims to serve as an unparalleled resource for meeting these challenges Updated and revised from the previous edition this text features over 40 new peer reviewed chapters new references and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine

[SDGs in the Americas and Caribbean Region](#) Walter Leal Filho, Noé Aguilar-Rivera, Bruno Borsari, Paulo R. B. de Brito, Baltazar Andrade Guerra, 2023-08-31 This volume provides an overview of the ways sustainable development issues as a whole and the SDGs in particular are perceived and practiced in a variety of countries in the Latin America and Caribbean region It also discusses the extent to which its many socio economic problems hinder progress towards the pursuit of a sustainable future and documents successful experiences from across the region This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative

The Regulation and Policy of Latin American Energy Transitions Lucas Noura Guimarães, 2020-02-19 The Regulation and Policy of Latin American Energy Transitions examines the ongoing revolution within the energy landscape of Latin America This book includes real world examples from across the continent to demonstrate the current landscape of energy policy in Latin America It focuses on distributed energy resources including distributed generation energy efficiency and microgrids but also addresses the role of less common energy sources such as geothermal and biogas as well as discusses the changing role of energy actors where consumers become prosumers or prosumagers and utilities become service providers The legal frameworks that are still hampering the transformation of the energy landscape are explored together with an analysis of the economic planning related and social aspects of energy transitions which can help address the issue of how inequalities are affecting and being affected by energy transitions The book is suitable for policy makers lawyers economists and social science professionals working with energy policy as well as researchers and industry professionals in the field It is an ideal source for anyone involved in energy policy and regulation
