Research During Medical Residency Lynne Bianchi, 2022-06-07 This book is a guide for medical residents and faculty in the fundamentals of clinical research publication practices and conference skills. It offers advice on how to incorporate scholarly activities into training routines so the process becomes more manageable and less burdensome. Suggestions for pursuing other scholarly activities outside of clinical research are also offered. Participation in research and other scholarly activities is a requirement for graduation from medical residency programs in the United States and many other countries. Faculty physicians who train residents are also required to produce annual scholarly work. Adding scholarship onto an already long list of requirements often feels a bit daunting to medical residents and the faculty who teach them. Fortunately there are many forms of scholarly activity including basic and clinical research quality improvement projects and educational assessments so everyone can find interesting and feasible projects to complete.
