Health Sciences Literature Review Made Easy Judith Garrard,2020-12-09 Health Sciences Literature Review Made Easy Sixth Edition is the ultimate how to guide for learning the practical and useful methods for reviewing scientific literature in the health sciences A Grammar of Qaqet Birgit Hellwig,2019-04-15 This grammar is a first detailed description of Qaqet a non Austronesian language spoken in the mountainous interior of East New Britain Province Papua New Guinea Qaqet belongs to the small Baining language family

comprising six languages but its wider genetic affiliations remain unclear. It is included among the geographically defined East Papuan languages. The grammar presents a synchronic description of the language. From a language family perspective, the Baining languages are structurally fairly similar but there are considerable differences in detail that point to different language internal developments and grammaticalization paths. From an East Papuan and areal perspective, Qaqet exhibits both typical East Papuan features (e.g. nominal classification, possessor possessed order, highly compositional lexicon) as well as areal features (e.g. AVO SV constituent order, articles and determiners, prepositions). The description is based on primary data collected during fieldwork from 2011 onwards, including both natural and elicited data. The description thereby provides new analyses and insights that are relevant to our understanding of the genetic and areal relationships in this region.
