Economics for the Common Good Jean Tirole, 2019-05-14 When Jean Tirole won the 2014 Nobel Prize in Economics he suddenly found himself being stopped in the street by complete strangers and asked to comment on issues of the day no matter how distant from his own areas of research His transformation from academic economist to public intellectual prompted him to reflect further on the role economists and their discipline play in society The result is *Economics for the Common Good* a passionate manifesto for a world in which economics far from being a dismal science is a positive force for the common good Economists are rewarded for writing technical papers in scholarly journals not joining in public debates But Tirole says we urgently need economists to engage with the many challenges facing society helping to identify our key objectives and the tools needed to meet them To show how economics can help us realize the common good Tirole shares his insights on a broad array of questions affecting our everyday lives and the future of our society including global
