Pre-Anesthesia Blood Screen Recommended For ALL Pets

Anesthesia carries some risk (even though it may be small). Therefore blood testing is recommended before general anesthesia. The anesthetic agent is removed from the body by the liver and kidneys, so it is important to know before anesthesia that these organs are functioning at 100%. Blood work can help us make this determination. If there is any indication of organ dysfunction, then appropriate steps can be taken to ensure my pet's safety.

Your veterinarian already may have recommended this procedure. If not, you can elect to have this inexpensive testing performed by marking the appropriate box below. Our laboratory is fully equipped and staffed to perform these tests. Results will be immediately available before general anesthesia and/or surgery. To request this service, please check the appropriate box.

- ☐ Yes, I want my pet to have pre-anesthesia blood screening at **\$66.55**.
- ☐ No, I do not want pre-anesthesia blood screening performed for my pet.

Pre-Operative IV Catheter & Fluids

Intravenous fluids through an IV catheter significantly reduces post-operative pain and enhances patient safety, maintaining proper blood pressure and preventing organ damage.

- ☐ Yes, I want my pet to have an IV catheter and fluids during anesthesia at **\$54.20**.
- ☐ No, I do not want an IV catheter and fluids for my pet.

ECG/Short Description For Pets

An electrocardiogram (ECG) is recommended for all pets prior to general anesthesia. Anesthesia places an added burden on the heart making it important to identify underlying conditions. Our hospital is fully equipped with ECG equipment. This makes rapid evaluation possible, and results will be available before general anesthesia. To request this service, please check the appropriate box. For cats, selecting this option will provide a brief echocardiogram instead of a full Hypertrophic Cardiomyopathy.

- ☐ Yes, I want my pet to have a pre-anesthesia ECG/Brief Echocardiogram at **\$63.33**.
- ☐ No, I do not want pre-anesthesia ECG/Brief Echocardiogram performed.

Klein, 2012-12-06 The second edition of this text catches the specialty of anesthesia at what will probably prove to be the apex of its influence and recognition amongst the specialties of medicine The scientific basis of the specialty is becoming increasingly well delineated Anesthesiologists have established themselves in local regional and national forums as spokespersons not only for the specialty but also for medicine in general And the specialty at last may be emerging from the stereotype of a faceless inarticulate shy and retiring figure whose outstanding characteristic was the cloying odor of diethyl ether Technology has moved into the specialty on seven league boots Just as an example the basic design of the anesthesia machine was stable between the early 1950s and certainly the late 1970s Suddenly in the blink of an eye our anesthesia machines are becoming intelligent are utilizing heads up displays and are becoming more and more capable of writing the anesthesia record Monitoring standards for anesthesia have burgeoned to the point that almost every aspect of the specialty is impinged upon by some rule and some thou will or thou will not The importation and creation of terminology is exploding In fact one of the problems in updating this book was deciding when to stop The author hopes that the goal of creating a snapshot in time through definitions of commonly used words and phrases has been achieved **Ambulatory Anesthesia, An Issue of Anesthesiology Clinics** Michael T.
