Human Biodiversity Jonathan M. Marks,2001 Are humans unique This simple question at the very heart of the hybrid field of biological anthropology poses one of the false of dichotomies with a stereotypical humanist answering in the affirmative and a stereotypical scientist answering in the negative The study of human biology is different from the study of the biology of other species In the simplest terms people s lives and welfare may depend upon it in a sense that they may not depend on the study of other scientific subjects Where science is used to validate ideas four out of five scientists preferring a brand of cigarettes or toothpaste there is a tendency to accept the judgment as authoritative without asking the kinds of questions we might ask of other citizens pronouncements In Human Biodiversity Marks has attempted to distill from a centuries long debate what has been learned and remains to be learned about the biological differences within and among human groups His is the first such attempt by an anthropologist in years for genetics has undermined the fundamental assumptions of racial taxonomy The history of those assumptions from Linnaeus to the recent past the history of other more useful assumptions that derive from Buffon and have reemerged to account for genetic variation are the poles of Marks s exploration

New Directions in Anthropology and Environment Carole L. Crumley, 2002-05-09 Carole L Crumley has brought together top scholars from across anthropology

in a benchmark volume that displays the range of exciting new work on the complex relationship between humans and the environment. Continually pursuing anthropology's persistent claim that both the physical and the mental world matter, these environmental scholars proceed from the holistic assumption that the physical world and human societies are always inextricably linked. As they incorporate diverse forms of knowledge, their work reaches beyond anthropology to bridge the sciences, social sciences, and the humanities, and to forge working relationships with non-academic communities and professionals. Theoretical issues such as the cultural dimensions of context, knowledge, and power are articulated alongside practical discussions of building partnerships, research methods, and ethics, and strategies for implementing policy. *New Directions in Environment and Anthropology* will be important for all scholars and non-academics interested in the relation between our species and its biotic and built environments. It is also designed for classroom use in and beyond anthropology, and students will be greatly assisted by suggested reading lists for their further exploration of general concepts and specific research. Osteometric Assessment of 20th Century Skeletons from Thailand and Hong Kong Christopher A. King, 1997-10. Cranial and postcranial research on East and Southeast Asians has shown population variability between and within these two regions. Moreover, as populations vary by sex, sex differences vary by population. The purpose of this study is to provide the first descriptive and comparative analysis of two recently curated samples of complete documented contemporary skeletons from Thailand (N 104) and Hong Kong (N 94) that have not been previously studied. Sex differences reveal Hong Kong males and females as larger but less dimorphic than Thais. Stepwise discriminant function analysis of the Thai humerus and femur allowed 94%–96% sex classification accuracy. In conclusion, this research has increased our knowledge of sex and population differences in Asia and has important applications to demographic and medicolegal investigations. *History of Physical Anthropology* Frank Spencer, 1997. The comparative study of humans as biological organisms, their evolution, and their physiological and anatomical functions, and ecology of primates surveys the entire field and summarizes and organizes the basic knowledge, fundamental principles, and development. **Index-catalogue of the Library of the Surgeon-General's Office, United States Army** National Library of Medicine (U.S.), Library of the Surgeon-General's Office (U.S.), 1918. Collection of incunabula and early medical prints in the library of the Surgeon General's office, U.S. Army. Ser 3 v 10 p 1415–1436. *The Promised City* Moses Rischin, 1977. Rischin paints a vivid picture of Jewish life in New York at the turn of the century. Here are the old neighborhoods and crowded tenements, the Rester Street markets, the sweatshops, the birth of Yiddish theatre in America, and the founding of important Jewish newspapers and labor movements. The book describes too the city's response to this great influx of immigrants, a response that marked the beginning of a new concept of social responsibility. *Index-catalogue of the Library of the Surgeon General's Office, United States Army* Army Medical Library (U.S.), 1918. *Anthropology News*, 2008. *Occupations of Federal White-collar Workers*, 1955.
