Digital Solutions for Contemporary Democracy and Government Bwalya, Kelvin Joseph, Mutula, Stephen, 2015-04-30 The dot com revolution has brought many advances before unimagined. Of them all it may be said that none have surpassed e government in attracting a significant number of researchers and practitioners from around the world. However the question remains whether everyone is ready to join the e government movement or if some are just blindly following the latest trend. **Digital Solutions for Contemporary Democracy and Government** touches on several key issues and challenges surrounding the recent e government boom and offers practical solutions from those who have been a part of implementing e government programs internationally. Due to its breadth of discussion on a variety of topics relating to the intersection of technology with politics, democracy and government, this authoritative book is a valuable reference source for professionals, researchers and students in the field of e government, information management or knowledge management.

IT Solutions Series: Humanizing Information Technology: Advice from Experts Schelin, Shannon H., Garson, G. David, 2004-01-01 The role of information technology (IT) has become increasingly important in both private and public sectors over recent years. The advent of personal computers, information networks and the Internet has engendered an information revolution which has created new means of production, new communication patterns and new work processes. The ability to buy and sell goods and services via the Internet has led to new private sector industries and new business and government models. Furthermore, there is an emerging realization that implementation of IT is more than just a shift in communication patterns or mediums. At least potentially it involves a transformation of an organization's culture. Learning Management System Technologies and Software Solutions for Online Teaching: Tools and Applications Kats,

Yefim, 2010-05-31 This book gives a general coverage of learning management systems followed by a comparative analysis of the particular LMS products, review of technologies supporting different aspects of educational process and the best practices and methodologies for LMS supported course delivery.
