Connections ,2006 From the PFP website The Consortium is providing a family of publications covering the full range of security studies to an international standard of excellence serving the military civilian and academic needs of the Consortium membership Currently this family includes Quarterly journal Athena papers Bulletins Information papers Neural Circuit Formation and Sensory Inputs Hitoshi Sakano,Kensaku Mori ,Charles A. Greer,2024-11-11 Sensory systems play important roles in inducing a variety of responses that are critical to the survival of individuals and species Neural circuits are generated by a combination of activity dependent and independent processes The basic architecture of sensory systems is built before birth based on a genetic program However the neural maps and circuits are further refined after birth in an activity dependent manner If the system is left unstimulated in neonates its function is permanently impaired and cannot be recovered even when it is stimulated after the critical period *Current Views of Hypothalamic Contributions to the Control of Motivated Behaviors* Joel D. Hahn,George Fink,Menno R. Kruk,B. Glenn Stanley,2019-11-27 The increasing availability of technologies for interrogating genetically targeted neurons is driving a resurgence of empirical research aimed at determining the structure and function of the neural systems that control motivated behaviors This has refocused attention on the hypothalamus whose central role in behavioral control was identified about a century ago As a result new insights into hypothalamic contributions to the control of motivated behaviors are emerging driven not only by the application of new technologies but also by the application in parallel of iteratively refined established techniques and increasingly by informatics approaches applied to maturing neuroscience databases With this renewed interest in decrypting hypothalamic contributions to the control of motivated behaviors it is timely to provide an updated overview that bridges current insights and historical foundations **The Flexible Phenotype** Theunis Piersma,Jan A. van Gils,2011 In essence the authors argue for the existence of direct measurable links between phenotype and ecology Trace Fossils William Miller III,2011-10-13 This book serves as an up to date introduction as well as overview to modern trace fossil research and covers nearly all of the essential aspects of modern ichnology Divided into three section Trace Fossils covers the historical background and concepts of ichnology on going research problems and indications about the possible future growth of the discipline and potential connections to other fields This work is intended for a broad audience of geological and biological scientists Workers new to the field could get a sense of the main concepts of ichnology and a clear idea of how trace fossil research is conducted Scientists in related disciplines could find potential uses for trace fossils in their fields And established workers could use the book to check on the progress of their particular brand of ichnology By design there is something here for novice and veteran insider and outsider and for the biologically oriented workers and for the sedimentary geologists Presents a review of the state of ichnology at the beginning of the 21st Century Summarizes the basic concepts and methods of modern trace fossil research Discusses crucial background information about the history of trace fossil research the main concepts of ichnology

examples of current problems and future directions and the potential connections to other disciplines within both biology and geology **Large-scale dam removal and ecosystem restoration** Rebecca McCaffery, Laura Soissons, Jeffrey J.

Duda, Jean-Marc Roussel, 2024-09-20 Rivers are vital ecosystems that support aquatic and terrestrial biodiversity and several ecosystem services including food water culture and recreation After centuries of building dams on rivers across the world dam removal projects are now on the rise due to obsolescence reservoir sedimentation insufficient return on investment or river restoration and conservation priorities Most dam removal projects have focused on smaller structures 10 m in structural height but larger structures have also started to be removed in increasing numbers as practitioners river managers conservationists and the public have gained more experience with the practice Recent estimates suggest that only a small fraction of dam removals have been scientifically studied and include mostly small dams and short time scales Documenting the long term ecological outcomes of large dam removal i e 10 m tall represents a new frontier in dam removal research projects are more recent and provide an opportunity to understand the complex ecological changes that occur with these transformative restoration projects Here we aim to collate a diverse array of papers on long term dam removal research projects involving larger dams 10 m to synthesize the issues outcomes tools and experimental designs used to study large dam removal projects from physical biological and ecological perspectives With this collection we aim to showcase diverse global projects on ecosystem responses to large dam removal collect perspectives from different disciplines fields and geographies and synthesize the current state of knowledge in this area We expect that this Research Topic will be informative to ongoing long term ecological restoration and monitoring projects related to dam removal as well as to upcoming large dam removal projects We welcome contributions from all disciplines addressing the physical ecological and ecosystem responses to large scale dam removal Contributions could include original research in a specific discipline or area case studies or synthesis papers that address one or more of these topics in a transdisciplinary approach Contributors could address any of the following major topics as related to outcomes of large dam removal alone or in combination Freshwater estuarine and marine aquatic biota River and reservoir geomorphology Terrestrial and riparian vegetation Wildlife Sedimentation and Modelling We would like contributors to highlight key results in their area of study cross disciplinary insights and lessons learned that could inform ongoing monitoring and research efforts in current projects as well as upcoming large dam removals **Beavers** Frank Rosell, Róisín Campbell-Palmer, 2022 Over the last 20 years there has been a huge increase in the number of scientific papers published on these remarkable creatures and an authoritative synthesis is now timely This accessible text goes beyond their natural history to describe the impacts on humans conflict mitigation animal husbandry management and conservation **The Wire** , 2006 Complexity and Self-Organization Carlos Gershenson, Daniel Polani, Georg Martius, 2021-05-19 **Index Medicus** , 2004 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings
