Conceived in the 1930s simplified and successfully tested in the 1950s the darling of the automotive industry in the early 1970s then all but abandoned before resurging for a brilliant run as a high performance powerplant for Mazda the Wankel rotary engine has long been an object of fascination and more than a little mystery A remarkably simple design yet understood by few it boasts compact size light weight and nearly vibration free operation In the 1960s German engineer Felix Wankel's invention was beginning to look like a revolution in the making Though still in need of refinement it held much promise as a smooth and powerful engine that could fit in smaller spaces than piston engines of similar output Auto makers lined up for licensing rights to build their own Wankels and for a time analysts predicted that much of the industry would convert to rotary power This complete and well illustrated account traces the full history of the engine and its use in various cars motorcycles snowmobiles and other applications It clearly explains the working of the engine and the technical challenges it presented the difficulty of designing effective and durable seals early emissions troubles high fuel consumption and others The work done by several companies to overcome these problems is described in detail as are the economic and political troubles that nearly killed the rotary in the 1970s and the prospects for future rotary powered vehicles Mazda MX-5 Miata 1.6 Enthusiast's Workshop Manual Rod Grainger, 2017 Superbly detailed text with over 1500 photographs covering every detail of important jobs without resorting to special tools Parallel Problem Solving from Nature - PPSN VII Juan J. Merelo, Panagiotis Adamidis, Hans-Georg Beyer, 2003-06-30 We are proud to introduce the proceedings of the Seventh International Conference on Parallel Problem Solving from Nature PPSN VII held in Granada Spain on 7-11 September 2002 PPSN VII was organized back to back with the Foundations of Genetic Algorithms FOGA conference which took place in Torremolinos Malaga Spain in the preceding week The PPSN series of conferences started in Dortmund Germany 1 From that pioneering meeting the event has been held biennially in Brussels Belgium 2 Jerusalem Israel 3 Berlin Germany 4 Amsterdam The Netherlands 5 and Paris France 6 During the Paris conference several bids to host PPSN 2002 were put forward it was decided that the conference would be held in Granada with Juan J Merelo Guervos as General Chairman The scientific content of the PPSN conference focuses on problem solving paradigms gleaned from natural models with an obvious emphasis on those that display an innate parallelism such as evolutionary algorithms and ant colony optimization algorithms The majority of the papers however concentrate on evolutionary and hybrid algorithms as is shown in the contents of this book and its predecessors This edition of the conference proceedings has a large section on applications that they to classical problems or to real world engineering problems which shows how bioinspired algorithms are extending their use in the realms of business and enterprise **New Motor Vehicle Emission Standards and Fuel Economy** United
