

■ Automatic Locking Mode

In this mode, the shoulder belt is automatically pre-locked. The belt will still retract to remove any slack in the shoulder belt.

The automatic locking mode is not available on the driver seat belt.

▼ When to use the automatic locking mode

- When a tight lap/shoulder fit is desired.
- **Any time** a child safety seat is installed in a passenger front seating position. Children 12 years old and under should be properly restrained in the rear seat (if equipped) **whenever possible**. Refer to "Child Restraint" in this section.

▼ How to use the automatic locking mode

1. Buckle the combination lap and shoulder belt.
2. Grasp the shoulder portion and pull downward until the entire belt is extracted.
3. Allow the belt to retract. As the belt retracts, you will hear a clicking sound. This indicates the safety belt is now in the automatic locking mode.

▼ How to disengage the automatic locking mode

Disconnect the combination lap/shoulder belt and allow it to retract completely to disengage the automatic locking mode and activate the emergency locking mode.

- This vehicle has a seat belt system with an energy management feature at the front seating positions to help further reduce the risk of injury in the event of head-on collision.
- This seat belt system has a retractor assembly that is designed to pay out webbing in a controlled manner. This feature is designed to help reduce the belt force acting on an occupant's chest.
