Singing to the Plants Stephan V. Beyer, 2010-01-15 In the Upper Amazon mestizos are the Spanish speaking descendants of Hispanic colonizers and the indigenous peoples of the jungle Some mestizos have migrated to Amazon towns and cities such as Iquitos and Pucallpa most remain in small villages They have retained features of a folk Catholicism and traditional Hispanic medicine and have incorporated much of the religious tradition of the Amazon especially its healing sorcery shamanism and the use of potent plant hallucinogens including ayahuasca The result is a uniquely eclectic shamanist culture that continues to fascinate outsiders with its brilliant visionary art Ayahuasca shamanism is now part of global culture Once the terrain of anthropologists it is now the subject of novels and spiritual memoirs while ayahuasca shamans perform their healing rituals in Ontario and Wisconsin Singing to the Plants sets forth just what this shamanism is about what happens at an ayahuasca healing ceremony how the apprentice shaman forms a spiritual relationship with the healing plant spirits how sorcerers inflict the harm that the shaman heals and the ways that plants are used in healing love magic and sorcery

Forensic Entomology Jason H. Byrd, 2002-01-01 Insects and other arthropods found at a death scene can provide corroborating evidence regarding both the time and place of death as well as possible antemortem and postmortem treatment of the victim Nevertheless most forensic investigators are not specially trained in entomology and until now no entomology reference has fully explored these subjects Forensic Entomology The Utility of Arthropods in Legal Investigations usurps this void instructing even individuals without a background in entomology on what to search for when recovering entomological evidence at a crime scene

Another Boom for Amazonia? Jr. Penn, 2010-05 This study examines the socioeconomic and environmental implications of the new camu camu industry in Peru Camu camu *Myrciaria dubia* is a small

tree native to wetlands of the Amazon basin It is especially abundant in Peruvian Amazonia The high vitamin C content of the fruit has generated interest in exporting camu camu products from Amazonia to more developed countries The government of Peru has been actively promoting this new extractive industry as well as the planting of camu camu in rural areas Non governmental development organizations and private industry are now actively involved with camu camu projects and enterprises In Peru enthusiasm for this native species is high because camu camu is expected to provide a much needed and sustainable economic boost for the region However many questions about the environmental implications and socioeconomic impacts of the camu camu export industry need to be answered in order to understand its ecological and economic viability and its effects on business and in rural communities Winner of 2010 Dissertation Excellence Award Findings indicate that camu camu has provided significantly more income to rural residents than is provided by the traditional boom and bust economies of Amazonia Households who adopted camu camu as a new crop in their floodplain agroforestry systems farmed significantly more floodplain land than non adopters and were especially adept at experimenting with new innovations Lack of agricultural credit is a major constraint to adopting camu camu as a new crop in Peru Geographic isolation and the location of processing facilities in relation to fruit harvests present major obstacles to the economic viability of the new industry Camu camu was found to be cultivated with a higher diversity of annual crops than is typical in floodplain fields of the region Extraction of camu camu fruits from the wild does not appear to have a negative environmental impact at least in the initial years of the industry This non timber forest product in the process of domestication can support a viable industry in the Peruvian Amazon if agricultural extension methods and marketing channels are improved **Ecuador's Amazon**

Region Peter Krahenbuhl, 2009-09-10 Welcome to the wildest place on earth Ecuador's upper Amazon Basin referred to locally as the Oriente awaits you Spanning most of the SucumbA os Province this region is unquestionably one of the most biologically diverse regions on the planet Here you can experience incredible wildlife viewing and bird watching nature photography jungle hikes dugout canoe excursions and a unique mix of native people adapted to life in the heart of the tropics From bird size butterflies to butterfly size birds from piranhas to vampire bats from poison arrow frogs to monster anacondas and from spider monkeys to howler monkeys the sky is the limit for the spirited soul The area surrounding Tena and MisahuallA is the most visited rainforest destination in the country One of the more developed regions of the upper Amazon it is also the most accessible Jungle excursions abound and there are still small patches of primary forest mostly in the form of private reserves Outstanding rafting kayaking swimming tubing and hiking opportunities are available as well as birding botany medicinal study cultural and general nature travel Farther down the RA o Napo the land becomes more pristine In the south especially along the eastern slopes of the Andes and around Macas the rugged topography and lack of access have preserved some of the best wildlife viewing opportunities and intact indigenous cultures in Ecuador In this region virgin rainforest and the communities of the unique Achuar and Shuar Nations await the true adventure seeker As the

Andes descend dramatically eastward into the Napo region the true tropical lowland rainforest begins with the headwaters of the RA o Napo The Central Oriente offers ecological life zones similar to those in the northern region see The Upper Amazon Basin with many species that live here and nowhere else on earth This is due primarily to the mixture of different microclimates created by drastic elevation changes between the Andes and the Amazon resulting in small pockets of life that evolved separately from their close neighbors Thus biologically the Oriente a with up to 5% of the earth s plant species a is arguably the richest place on the planet This guide gives you all the details on where to stay where to eat what to do how to get around the entertainment and arts the history and culture Complete with maps and photos throughout *Laurie Pippen's All Natural Colorants for Cosmetic, Culinary, and Textile Dyeing* Laurie Pippen,2015-06-17 Colorants are everywhere You can find dyes in your decor cosmetics food and in nearly every fabric in the home from your socks to your furniture Many of these dyes are made using chemical alternatives to the abundant selection of all natural colorants you can find cheaply and easily in your own backyard Whether you are hoping to make life more natural by creating your own homemade colorants or hoping to replace one or two synthetic colorants with all natural plant dyes you will find that coloring with natural choices is easy fun and yields amazing results A natural colorant is a colorant that comes from minerals plants or invertebrates The most common natural colorants come from plant sources like bark berries flowers leaves and roots Potential dyeing options are everywhere and this book only illustrates the most traditionally used colorants and the methods I have employed to obtain my desired results My favorite forms of natural dyes come from plant parts like berries flowers leaves nuts and roots After reading this guide and gaining some skill with natural dyes you should look around and experiment to see what new and creative natural colorants might be available in your own back yard Remember that natural colorants are not just for dyeing fabric You can use natural colorants to create homemade ink paint or even to dye Easter eggs Some of our countries oldest documents were written with ink made from natural colorants You can also use natural colorants to make meals more healthy and appealing Sometimes I like to use unusual colors to make mealtime fun for the whole family Purple mashed potatoes or glowing orange rice is always a fun surprise You can even use plant products when you make personal care products like make up soaps and hair colorant Many commercial cosmetics you purchase have their color roots in natural product dyes and with a little knowledge and a bit of practice you can become a master at making pleasing looking and smelling products for your family that actually have benefits to go with their attractiveness Nearly anything you work with that needs color is a potential choice for natural plant dyes Natural colorants come in every shade you might want You can even blend or tone the colors up and down to achieve the exact result you need for your project
