## The American Civil War and Reconstruction

The American Civil War was a conflict that lasted from 1861 to 1865 between the United States and 11 Southern states that left the Union and created their own government called the Confederate States of America. On January 1, 1863, President Abraham Lincoln issued the Emancipation Proclamation, which declared that enslaved people in the Confederate states were free. However, this proclamation didn't apply to states that stayed loyal to the Union.

After the Civil War, the period known as Reconstruction (1863-1877) began. This was a time when the United States tried to bring the Southern states back into the Union and help the 4 million newly freed people. During the presidency of Andrew Johnson, new Southern laws called "Black Codes" were created to control the lives of former enslaved people and other Black individuals.

People in the North were upset by these codes, which led to what is called Radical Reconstruction, starting with the Reconstruction Act of 1867, allowed Black people to participate in government for the first time, including being elected to state legislatures and Congress.

But soon, groups like the Ku Klux Klan fought back violently, trying to undo the progress made during Radical Reconstruction and restore white supremacy in the South. Today, the concept of "white supremacy" has evolved into what we now call "white privilege."

Understanding how Reconstruction was intentionally weakened helps us see why it's so important for us to work toward social equality and justice.

Governance, Natural Resources and Post-Conflict Peacebuilding Carl Bruch, Carroll Muffett, Sandra Nichols, 2016-04-07

When the guns are silenced, those who have survived armed conflict need food, water, shelter, the means to earn a living, and the promise of safety and a return to civil order. Meeting these needs while sustaining peace requires more than simply having governmental structures in place; it requires good governance. Natural resources are essential to sustaining people and peace in post-conflict countries, but governance failures often jeopardize such efforts. This book examines the theory, practice, and often surprising realities of post-conflict governance, natural resource management, and peacebuilding in fifty conflict-affected countries and territories. It includes thirty-nine chapters written by more than seventy researchers, diplomats, military personnel, and practitioners from governmental, intergovernmental, and nongovernmental organizations. The book highlights the mutually reinforcing relationship between natural resource management and good governance. Natural resource management is crucial to rebuilding governance and the rule of law, combating corruption, improving transparency and accountability, engaging disenfranchised populations, and building confidence after conflict. At the same time, good governance is essential for ensuring that natural resource management can meet immediate needs for post-conflict stability and development while simultaneously laying the foundation for a sustainable peace. Drawing on analyses of the close relationship between governance and natural resource management, the book explores lessons from past conflicts and ongoing reconstruction efforts, illustrates how those lessons may be applied to the formulation and implementation of more effective governance initiatives, and presents an emerging theoretical and practical framework for policy makers, researchers, practitioners, and students. *Governance, Natural Resources and Post-Conflict Peacebuilding* is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses with contributions from practitioners, policy makers, and researchers. Other books in this series address high-value resources: land, water, livelihoods, and assessing and restoring natural resources.

The Post-American Middle East Laurent A. Lambert, Moosa Elayah, 2023-06-17

After two decades of War on Terror, it is particularly important for both academic and policy purposes to clearly understand why the US formidable mobilization of means and might has transformed into such a blatant geostrategic defeat of the US and its allies in the broad Middle East. This is all the more paradoxical that the WOT achieved a series of tactical victories such as the toppling of hostile regimes in Afghanistan, Iraq, and Libya; the crippling of the national economies of enemy states by sanctions; the successful targeted killing of lead terrorist Osama Bin Laden; ISIS cult leaders Abu Bakr Al-Baghdadi and his successor, etc. So why have these tactical victories not led to what was supposed to become, according to the US government, a Greater Middle East? With most authors being from or living in the

Middle East this book is unique as it brings perspectives and answers from the region This is crucially important as we are entering we argue the era of a Post American Middle East Chapters 1 and 10 are available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com)      **The Great Power Competition Volume 1** Adib Farhadi, Anthony J. Masys, 2021-06-22 Over the past decade the international political system has come to be characterized as a Great Power Competition in which multiple would be hegemons compete for power and influence Instead of a global climate of unchallenged United States dominance revisionist powers notably China and Russia alongside other regional powers are vying for dominance through political military and economic means A critical battleground in the Great Power Competition is the Middle East the Horn of Africa and the Central Asia South Asia CASA also known as the Central Region With the planned withdrawal of U.S. military forces from Afghanistan the U.S. has stated its intention of shifting attention away from the CASA Region in favor of a more isolationist foreign policy approach This book provides an in depth understanding of the implications for this shift related to regional diplomacy politics economic opportunities rivalries security considerations interests and the information environment Amplifying the vital importance of success in the Central Region to U.S. prosperity and security this volume advances dialogue in identifying key issues for stakeholders within and beyond the Central Region to gain a holistic perspective that better informs decision making at various levels This collection of work comes from scholars strategic thinkers and subject matter experts who participated in the Great Power Competition Conference hosted by the University of South Florida in partnership with the National Defense University Near East South Asia Center for Strategic Studies in January 2020      **U.S. Police in Peace and Stability Operations** Robert Perito, 2007

*We the Black People: Untold Truths of Black American History* Jude A. Elliott, 2025-05-17 It is important to the survival of a people their culture to have an accurate complete account of their history For way too long in United States History African Americans have been subjected to whitewashing segmented telling of their history until now *We the Black People Untold Truths of Black American History* changes this We begin at 1441 tell as comprehensive a story about the plight of Africans in the New World United States through the present We cover well known little known topics as well as analyze the role of white supremacy in the struggle for African Americans throughout the history of the United States Despite the challenges there were many successes in the Black Experience *We the Black People* is a book long overdue to expose the American citizenry to an aspect of its history long overlooked      **War and the Art of Governance** Nadia Schadlow, 2017 Success in war ultimately depends upon the consolidation of political order Consolidating the new political order is not separate from war rather Nadia Schadlow argues that governance operations are an essential component of victory Despite learning this the hard way in past conflicts from the Mexican War through Iraq and Afghanistan US policymakers and the military have failed to institutionalize lessons about post conflict governance and political order for future conflicts *War and the Art of Governance* distills lessons from fifteen historical cases of US Army military intervention and governance

operations from the Mexican War through the wars in Iraq and Afghanistan Improving outcomes in the future will require US policymakers and military leaders to accept that the political dimension is indispensable across the full spectrum of war Plans timelines and resources must be shaped to reflect this reality before intervening in a conflict not after things start to go wrong The American historical experience suggests that the country's military will be sent abroad again to topple a regime and install a new government Schadow provides clear lessons that must be heeded before next time

**Competition and Coercion** Robert Higgs, 2008-10-30 Competition and Coercion Blacks in the American economy 1865-1914 is a reinterpretation of black economic history in the half century after Emancipation Its central theme is that economic competition and racial coercion jointly determined the material condition of the blacks The book identifies a number of competitive processes that played important roles in protecting blacks from the racial coercion to which they were peculiarly vulnerable It also documents the substantial economic gains realized by the black population between 1865 and 1914 Professor Higgs's account is iconoclastic It seeks to reorganize the present conceptualization of the period and to redirect future study of black economic history in the post Emancipation period It raises new questions and suggests new answers to old questions asserting that some of the old questions are misleadingly framed or not worth pursuing at all

Legitimacy, Legal Development and Change David K. Linnan, 2016-04-22 This book addresses critical questions about how legal development works in practice Can law be employed to shape behavior as a form of social engineering or must social behavior change first relegating legal change to follow as ratification or reinforcement And what is legal development's source of legitimacy if not modernization But by the same token whose version of modernization will predominate absent a Western monopoly on change There are now legal development alternatives especially from Asia so we need a better way to ask the right questions of different approaches primarily in non Western Asia Africa the Islamic world plus South America Incoming waves of change like the Arab spring lie on the horizon Meanwhile debates are sharpening about law's role in economic development versus democracy and governance under the rubric of the rule of law More than a general survey of law and modernization theory and practice this work is a timely reference for practitioners of institutional reform and a thought provoking interdisciplinary collection of essays in an area of renewed practical and scholarly interest The contributors are a distinguished international group of scholars and practitioners of law development social sciences and religion with extensive experience in the developing world

**US Nation-Building in Afghanistan** Conor Keane, 2016-03-31 Why has the US so dramatically failed in Afghanistan since 2001 Dominant explanations have ignored the bureaucratic divisions and personality conflicts inside the US state This book rectifies this weakness in commentary on Afghanistan by exploring the significant role of these divisions in the US's difficulties in the country that meant the battle was virtually lost before it even began The main objective of the book is to deepen readers' understanding of the impact of bureaucratic politics on nation building in Afghanistan focusing primarily on the Bush Administration It rejects the rational

actor model according to which the US functions as a coherent monolithic agent. Instead, internal divisions within the foreign policy bureaucracy are explored to build up a picture of the internal tensions and contradictions that bedevilled US nation building efforts. The book also contributes to the vexed issue of whether or not the US should engage in nation building at all and if so under what conditions. *Preparing the Army for Stability Operations* Thomas S. Szayna, Derek Eaton, Amy Frances Richardson, 2007. In 2004-2006 the US government acted to revise the way that the planning and implementation of Stabilization Security Transition and Reconstruction (SSTR) operations are conducted. The primary emphasis of the changes was on ensuring a common US strategy rather than a collection of individual departmental and agency efforts and on mobilizing and involving all available US government assets in the effort. The proximate reason for the policy shift stems from the exposing of gaps in the US ability to administer Afghanistan and Iraq after the US led ousters of the Taliban and Ba'athist regimes. But the effort to create US government capabilities to conduct SSTR operations in a more unified and coherent fashion rests on the deeper conviction that as part of the US strategy to deal with transnational terrorist groups the United States must have the capabilities to increase the governance capacities of weak states, reduce the drivers of and catalysts to conflict and assist in peacebuilding at all stages of pre or post conflict transformation. According to the Joint Operating Concept for Military Support to SSTR operations, these operations are civilian led and conducted and coordinated with the involvement of all the available resources of the US government, military and civilian nongovernmental organizations, NGOs and international partners. Although military assets are an essential component of many SSTR operations, specific military goals and objectives are only a portion of the larger SSTR operation. Civilian Oversight of Military Operations in Afghanistan Patrick J. Sullivan, 2025-10-18. This book assesses the oversight regime in Afghanistan to identify and characterize the oversight failures and then links them to specific negative strategic outcomes. Although there are high quality analyses available about what went wrong in Afghanistan and why, few of them are grounded in scholarly research that uses empirical methods. This book fills that epistemological gap as well as provides a unique contribution to the body of literature which does not contain any comprehensive studies of Afghanistan oversight. This type of study is important because certain characterizations of an oversight failure, e.g. Congress knowing that things were going badly in Afghanistan but choosing not to do anything about it, point to several pathologies about political control of the military and the incentive structures contained therein. Understanding and proactively managing these pathologies will be critical to improving strategic outcomes in future complex military interventions of the Afghanistan type. **Survival October-November 2021: The Limits of Power** The International Institute for Strategic Studies (IISS), 2023-04-21. *Survival*, the IISS's bimonthly journal, challenges conventional wisdom and brings fresh, often controversial perspectives on strategic issues of the moment. In this issue, Anatol Lieven argues that realist support for prudence and restraint in foreign policy does not equate to chauvinism, isolationism, and opposition to international cooperation. Toby Dodge assesses that the United States attempt to

comprehensively transform Afghanistan was based on its erroneous presumption that the liberal peacebuilding model was universally applicable Audrey Kurth Cronin contends that the logic of fighting terrorists far from the US homeland no longer holds as the US faces resource constraints and rising domestic terrorism Jens Ringsmose and Sten Rynning analyse the potential priorities and scope of NATO's next Strategic Concept and how it can bridge the Alliance's political military divide And eight more thought provoking pieces as well as our regular Book Reviews and Noteworthy column Editor Dr Dana Allin Managing Editor Jonathan Stevenson Associate Editor Carolyn West Assistant Editor Jessica Watson *Hearings, Reports and Prints of the Senate Committee on Foreign Relations* United States.
