

Chapter 1: Understanding American Politics

Why Do We Have a Government

- Government- the system for implementing decisions made through the political process
 - Government that serves two purposes; to provide order and to promote the general welfare
- *To provide order*
- Why is there a government? To create order and tame "the state of nature"
 - Most important role of the government are policing and providing national security
 - Two goals of the federal government is to "provide for the common defense" and to "insure domestic tranquility" AKA military protection and law enforcement
 - Government is necessary to provide security
 - James Madison has a pessimistic yet realistic view on mankind: the government reflects people, if men were angels then there would be no need for the government and if angels were in the government then there would be no restraint of power
 - People only want what is best for themselves and their families therefore people with the same thinking group together known as factions
 - Madison's greatest fear was tyranny of a fraction imposing its will on the rest of the nation which is why many American colonists fled Europe in the first place
 - Federal government is divided by three ways; separation of power, checks and balances, and federalism
 - Separation of powers; judicial, executive, federal
 - Checks and balances; gives each branch some power over the two
 - Federalism; allots different responsibilities to local, state, and national government
 - With this division of power Madison reasoned no single faction could dominate the government
- *To Promote the General Welfare*
- Basically means tackling problems Americans cannot solve on their own
 - For example: taking care of the poor, the sick, the aged, global issues such as climate change, terrorist threats, and poverty in other countries
 - Government intervention is not inevitable as people can decide these problems aren't worth solving
 - If the people believe the issue is worth solving than government action is necessary because of public goods
 - If a group of 1,000 tried to figure out a problem on their own the group would suffer from free rider problem as everyone only cares about their best interests
 - The government provides public goods that that all those people acting on their own would not be able to provide
 - People elect leaders and pay taxes to provide those public goods
