I. Gurdjieff** Peter Demianovich Ouspensky,2020-09-28 BEFORE I BEGIN TO EXPLAIN TO YOU in a general way what this system is about and to talk about our methods I want particularly to impress on your minds that the most important ideas and principles of the system do not belong to me This is chiefly what makes them valuable because if they belonged to me they would be like all other theories invented by ordinary minds they would give only a subjective view of things When I began to write A New Model of the Universe in 1907 I formulated to myself as many other people have done before and since that behind the surface of the life which we know lies something much bigger and more important And I said to myself then that until we know more about what lies behind all our knowledge of life and of ourselves is really negligible I remember one conversation at that time when I said If it were possible to accept as proven that consciousness or as I should call it now intelligence can manifest itself apart from the physical body many other things could be proved Only it cannot be taken as proved I realized that manifestations of supernormal psychology such as thought transference clairvoyance the possibility of knowing the future of looking back into the past and so on have not been proved So I tried to find a method of studying these things and worked on that line for several years I found some interesting things in that way

but the results were very elusive and though several experiments were successful it was almost impossible to repeat them I came to two conclusions in the course of these experiments first that we do not know enough about ordinary psychology we cannot study supernormal psychology because we do not know normal psychology Secondly I came to the conclusion that certain real knowledge exists that there may be schools which know exactly what we want to know but that for some reason they are hidden and this knowledge is hidden So I began to look for these schools I travelled in Europe Egypt India Ceylon Turkey and the Near East but it was really later when I had already finished these travels that I met in Russia during the war a group of people who were studying a certain system which came originally from Eastern schools This system began with the study of psychology exactly as I had realized it must begin The chief idea of this system was that we do not use even a small part of our powers and our forces We have in us so to speak a very big and very fine organization only we do not know how to use it In this group they employed certain oriental metaphors and they told me that we have in us a large house full of beautiful furniture with a library and many other rooms but we live in the basement and the kitchen and cannot get out of them If people tell us about what this house has upstairs we do not believe them or we laugh at them or we call it superstition or fairy tales or fables This system can be divided into study of the world on certain new principles and study of man The study of the world and study of man include in themselves a kind of special language We try to use ordinary words the same words as we use in ordinary conversation but we attach a slightly different and more precise meaning to them Study of the world study of the universe is based on the study of some fundamental laws which are not generally known or recognized in science The two chief laws are the Law of Three and the Law of Seven which will be explained later Included in this and necessary from this point of view is the principle of scale a principle which does not enter into ordinary scientific study or enters very little The study of man is closely connected with the idea of the evolution of man but the evolution of man must be understood in a slightly different way from the ordinary Ordinarily the word evolution applied either to man or to anything else presupposes a kind of mechanical evolution I mean that certain things by certain known or unknown laws transform into other things and these other things transform into still others and so on But from the point of view of this system there is no such evolution at all I do not speak in general but specifically of man The evolution of man if it occurs can only be the result of knowledge and effort as long as man knows only what he can know in the ordinary way there is no evolution for him and there never was any evolution for him Serious study begins in this system with the study of psychology that is to say with the study of oneself because psychology cannot be studied as astronomy can outside oneself A man has to study himself When I was told that I saw at once that we do not have any methods of studying ourselves and already have many wrong ideas about ourselves So I realized that we must get rid of wrong ideas about ourselves and at the same time find methods for studying ourselves Perhaps you realize how difficult it is to define what is meant by psychology There are so many meanings attached to the same words in different systems that it is difficult to have a general definition So we begin by

defining psychology as study of oneself You have to learn certain methods and principles and according to these principles and using these methods you will try to see yourselves from a new point of view **Asteroid Answers to Ancient Calendar Mysteries** Herbert B. Stollorz,2008-07-03 Ancient calendars found around the world are designed to end one point in time They communicate an urgent warning to everyone alive today Complex bronze and gold clocks with multiple dials are found in museums around the world Why they have such advanced intricacy has stumped scientists for hundreds of years This book reveals why the ancients built so many pyramids observatories as well as those complex gold and bronze clocks with more than one dial It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012 It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time history and prophecy which is history written in advance The most famous example is the Mayan Aztec calendar which ends its 25 626 year cycle on that momentous date Some researchers have also found 21 December 2012 in what is called the Bible Code Using very different research methods I discovered it in the Bible s book of Revelation and Daniel s prophecies It is one of the most important dates in the plan of God for all humanity **The New Answers Book Volume 4** Ken Ham,2013-10-01 What about climate change Is there a connection between dragon legends and dinosaurs Is evolution the bloodiest religion ever What about cavemen What are the 10 best evidences for a young creation The Answers series has been a powerful tool in equipping believers to share and defend their faith Now the newest book in this landmark series takes on hot button topics like climate change ancient man and many more Too many people have walked away from their faith because they sought answers for what seemed a contradiction in Christian belief and scientific teaching For those who desire a deeper walk and a thriving faith in the face of a growing cultural adversity now find the answers to questions you have or others may use to genetic engineering this powerful team of apologists is able to inspire you and those you know who may not yet believe **THE MODERN ERA'S DILEMMA** Vikrant Singh Dadwal,2024-09-09 There s no doubt that we have achieved the unprecedented technological advancements to build the foundations of this modern era The Modern Era s Dilemma delves into the anxiety and stress of this unending chase for progress It explores the hidden cost of this progress that s causing this increasing anxiety and stress It uncovers the myopic view of humans and their clouded judgement in taking decisions for their future and the future of this planet The book presents a perspective for readers that challenges to ask questions and seek answers for these intriguing questions The questions around growth prosperity wealth and progression Presented with a blend of many stories and philosophies from mythology references and experiences the book narrates the urgency of creating a balance that can support sustainable living and bring out real essence of human connection with natural ecosystem As we witness this situation that s becoming alarming for the future this book calls for collective thinking and action by the readers The word needs to spread and action needs to be taken to bring the change The change that can establish balance and bring

back the traditional wisdom of living in harmony with nature and other beings on this planet Modernization is important but we need to introspect thoughtfully on the price being paid for it
