Cutting-Edge Language and Literacy Tools for Students on the Autism Spectrum Beals, Katharine P.,2022-06-24

Providing all students particularly those with learning disabilities with the skills necessary to succeed in school and by extension the real world is vital in today's educational landscape. Due to this need, innovative language and literacy tools have been developed to support these students in their learning endeavors and ensure they are receiving the best education possible. Cutting Edge Language and Literacy Tools for Students on the Autism Spectrum covers the root causes of the language and learning challenges in autism, their consequences for language acquisition and literacy, and a variety of tools and strategies for addressing them, from teaching technologies to assistive technologies. Drawing on what the most current evidence shows about the nature of autism and which therapies and technologies are most successful, the book reviews the efficacy of existing language therapies, literacy strategies, and assistive technologies. Covering topics such as speech deficits, language learning, comprehension, and assistive communication tools, this reference work is ideal for clinicians, behavioral specialists, speech language pathologists, special educators, researchers, academicians, practitioners, scholars, educators, and students.

ECHO: A Vocal Language Program for Easing Anxiety in Conversation Cesar E. Ruiz, Evelyn R. Klein, Louis R. Chesney, 2021-12-13. ECHO: A Vocal Language Program for Easing Anxiety in Conversation is for clinicians supporting individuals who may experience social anxiety related to speaking in specific situations or with certain individuals. Anxiety has a negative impact on working memory, which can make it difficult for individuals to communicate with ease. With reduced experiences talking to a variety of people in various situations, speaking often becomes more challenging. The ECHO program was developed to build ease and comfort with social pragmatic communication, focusing on improving conversational skills for children from later elementary through teenage years. The program can be implemented by speech language pathologists, psychologists, educators, and other facilitators, including parents, who support the needs of children and teens with selective mutism, stuttering, and those in need of social communication support. This unique intervention program combines methods of vocalization and verbalization to enhance conversational skills with role-play simulations for real-life application. There are three modules in the ECHO program that build upon each other. Module 1 uses interactive games to focus on vocal control, helping the child or teen learn how to initiate voice, modulate intonation, and volume with greater ease and produce classes of speech sounds in words and sentences. Module 2 provides targeted skills for the child or teen to use language for different purposes, change language for the listeners or situation, and follow rules for conversation and storytelling, all with online

interactive games to become a more spontaneous communicator Module 3 builds on the previous two modules by providing conversational role plays which simulate real life situations in school at home and in social and public settings A cognitive behavioral therapy CBT framework is applied to help reduce cognitive distortions Key Features Three modules bridging the gap from vocalization to conversation The ECHO Checklist to identify communication needs Social Communication Skills Pragmatics Checklist The ARC model for understanding anxiety tolerance rescue reduction and communication confidence Thirty five interactive games and activities with over 150 photos online and printed to help children and teens gain skills necessary to vocalize and engage in conversation Disclaimer Please note that ancillary content such as documents audio and video etc may not be included as published in the original print version of this book
