Rocket Propulsion Elements George P. Sutton, Oscar Biblarz, 2011-09-09 The definitive text on rocket propulsion now revised to reflect advancements in the field For sixty years Sutton s Rocket Propulsion Elements has been regarded as the single most authoritative sourcebook on rocket propulsion technology As with the previous edition coauthored with Oscar Biblarz the Eighth Edition of Rocket Propulsion Elements offers a thorough introduction to basic principles of rocket propulsion for guided missiles space flight or satellite flight It describes the physical mechanisms and designs for various types of rockets and provides an understanding of how rocket propulsion is applied to flying vehicles Updated and strengthened throughout the Eighth Edition explores The fundamentals of rocket propulsion its essential technologies and its key design rationale The various types of rocket propulsion systems physical phenomena and essential

relationships The latest advances in the field such as changes in materials systems design propellants applications and manufacturing technologies with a separate new chapter devoted to turbopumps Liquid propellant rocket engines and solid propellant rocket motors the two most prevalent of the rocket propulsion systems with in depth consideration of advances in hybrid rockets and electrical space propulsion Comprehensive and coherently organized this seminal text guides readers evenhandedly through the complex factors that shape rocket propulsion with both theory and practical design considerations Professional engineers in the aerospace and defense industries as well as students in mechanical and aerospace engineering will find this updated classic indispensable for its scope of coverage and utility , *Handbook of Chemical Mass Transport in the Environment* Louis J. Thibodeaux,Donald Mackay,2010-10-21 A comprehensive account of the state of the science of environmental mass transport Edited by Louis J Thibodeaux and Donald Mackay renowned experts in this field the *Handbook of Chemical Mass Transport in the Environment* covers those processes which are critically important for assessing chemical fate exposure and risk In a comprehensive and authoritative format this unique handbook provides environmental chemists geoscientists engineers and modelers with the essential capabilities to understand and quantify transport In addition it offers a one stop resource on environmental mass transfer and mass transport coefficient estimation methods for all genres The book begins by discussing mass transport fundamentals from an environmental perspective It introduces the concept of mobility key to environmental fate since transport must occur prior to any reaction or partitioning within the natural multimedia compartments The fugacity approach to environmental mass transfer and the conventional approach are examined This is followed by a description of the individual mass transport processes and the appropriate flux equations required for a quantitative expression The editors have identified 41 individual processes believed to be the most environmentally significant which form the basis for the remainder of the book Using a consistent format for easy reference each chapter Introduces the specific processes Provides a detailed qualitative description Presents key theoretical mathematical formulations Describes field or laboratory measurements of transport parameters Gives data tables and algorithms for numerical estimates Offers a guide for users familiar with the process who are seeking a direct pathway to obtain the numerical coefficients Presents computed example problems case studies and or exercises with worked through solutions and answers The final chapter presents the editors insight into future needs and emerging priorities Accessible and relevant to a broad range of science and engineering users this volume captures the state of the transport science and practice in this critical area **Comprehension Processes in Reading** David A. Balota,G.B. Flores d'Arcais,Keith Rayner,2012-11-12 *Comprehension Processes in Reading* addresses the interrelationship among several areas relevant to understanding how people comprehend text The contributors focus on the on line processes associated with text understanding rather than simply with the product of that comprehension what people remember from reading Presenting the latest theories and research findings from a distinguished group of contributors *Comprehension Processes in Reading* is
