Medical Informatics 20/20: Quality and Electronic Health Records through Collaboration, Open Solutions, and Innovation Douglas Goldstein, Peter J.

Groen, Suniti Ponkshe, Marc Wine, 2007-01-04 Despite pressure from the private sector to market their own custom solutions, the healthcare industry is coming around to the idea of applying the strategies of collaboration, open solutions, and innovation to meet the ever-changing demands for healthcare information to support quality and safety. Clark, 2006-03-14 The challenges in development often seem insurmountable. They overwhelm nations and the builders of their most basic institutions. I am often asked how development finance agencies can work together to meet this challenge. In reply, I invite you to read a story about cooperation in rebuilding one of the most basic institutions of any society: the banking system. KfW Bankengruppe places great emphasis on financial sector development. Our experience in our own country and beyond our borders shows that one of the first steps is building a banking system that fuels growth through investment in enterprises. Micro, small, and medium enterprises are the backbone of many economies; they are also the wealth of the people and generate their hope in the future. We believe that the depth of the financial sector is related to economic growth: the growth and safety of deposits, the facility of payments, and the invitation to develop new products and services that strengthen markets and promote investment. A strong banking system supports economic growth by attracting unproductive capital and injecting it into the economy, increasing the productivity of the country's capital base and leveraging it by attracting outside capital.
