International Bestseller Digital Literacy:

International Bestsellers and the Online Reconfiguring of National Identity Rachel Noorda, Millicent Weber, Melanie Ramdarshan Bold, 2024-05-23 International bestsellers are the ideal sites for examining the complicated relationship between literary culture and national identity. Despite the transnational turns in both literary studies and book history, place is still an important configurator of twenty-first-century book reception. Books are crucial to national identity and catalysts of nationalist movements. On an individual level, books enable readers to shape and maintain their own national identities. This Element explores how contemporary readers' understandings of nation, race, ethnicity, gender, and class continue to shape their reading, using as case studies the online reception of three bestseller titles: Liane Moriarty's *Big Little Lies* (Australia), Zadie Smith's *NW* (UK), and Kevin Kwan's *Crazy Rich Asians* (USA). In doing so, this Element demonstrates the need for and articulates a transnational conceptualisation of the relationship between reader identity and reception. **The Magic of Innovation**

Olga A. Kravtsova, Dmitry A. Kryachkov, Tamara O. Kuznetsova, 2015-04-01 This volume focuses on innovative approaches to teaching foreign language courses offered to non-language degree students. It includes essays related to the innovative use of ICTs, new developments in methodology, approaches to course and materials design, and the contribution of language theory to foreign language teaching. As the book brings together researchers and practitioners working in a variety of contexts, it provides detailed insight into ways the same challenges are dealt with in different educational environments. The ideas and experiences analysed in this collection of essays will appeal to anyone interested in the current trends in foreign language teaching and learning, particularly educationalists. The best practices in FLT that the book offers will be a source of inspiration for in-service teachers and course designers, while the theoretical backgrounds provided in each chapter will be valuable to pre-service teachers and stimulating to researchers. *From Computer Literacy to Informatics Fundamentals*
