Marie-Laure Ryan,Lori Emerson,Benjamin J. Robertson,2014-04-15 The first systematic comprehensive reference covering the ideas genres and concepts behind digital media The study of what is collectively labeled New Media the cultural and artistic practices made possible by digital technology has become one of the most vibrant areas of scholarly activity and is rapidly turning into an established academic field with many universities now offering it as a major The Johns Hopkins Guide to Digital Media is the first comprehensive reference work to which teachers students and the curious can quickly turn for reliable information on the key terms and concepts of the field The contributors present entries on nearly 150 ideas genres and theoretical concepts that have allowed digital media to produce some of the most innovative intellectual artistic and social practices of our time The result is an easy to consult reference for digital media scholars or anyone wishing to become familiar with this fast developing field Everyday Media Literacy Sue Ellen Christian,2023-10-17 In this second edition award winning educator Sue Ellen Christian offers students an accessible and informed guide to how they can consume and create media intentionally and critically The textbook applies media literacy principles and critical thinking to the key issues facing young adults today from analyzing and creating media messages to verifying information and understanding online privacy Through discussion prompts writing exercises key terms and links readers are provided with a framework from which to critically consume and create media in their everyday lives This new edition includes updates covering privacy aspects of

AI VR and the metaverse and a new chapter on digital audiences gaming and the creative and often unpaid labor of social media and influencers Chapters examine news literacy online activism digital inequality social media and identity and global media corporations giving readers a nuanced understanding of the key concepts at the core of media literacy Concise creative and curated this book highlights the cultural political and economic dynamics of media in contemporary society and how consumers can mindfully navigate their daily media use This textbook is perfect for students and educators of media literacy journalism and education looking to build their understanding in an engaging way The Radical Case for Teaching Skim Reading in First-Year Writing Ellen C. Carillo, 2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources
