

THE AMAZON RAINFOREST

Physical Geography

The Amazon Rainforest is the largest forest of any kind in the whole world. It covers an incredible 7 million square kilometres: it is more than 40 times larger than the UK! It grows in the tropical basin of the Amazon River (which is either the 1st or 2nd longest river in the world, depending on definition). It is thought that nearly a third (30%) of all of the world's plant and animal species live in

the Amazon Rainforest – it is the most diverse of all the world's rainforests. One square kilometre of Amazon rainforest can have about 90,000 tons of living plants, whilst one in five of all of the world's birds live here.

Human Geography

Indigenous people have lived in the Amazon Rainforest for thousands of years. There are some tribes that still live deep in the rainforest today, some of whom do not make contact with the outside world at all!

This region includes territory belonging to nine nations. Most of the forest is in Brazil, with 60% of the rainforest, followed by Peru with 13%, and Colombia with 10%. Venezuela, Ecuador, Bolivia, Guyana, Suriname and French Guiana have just a small amount of rainforest.

Deforestation of the Amazon is a problem that many people are worried about. More than one fifth of the Amazon rainforest has already been destroyed. The forest which remains is threatened. People who care for the environment warn about the loss of biodiversity. They also point out that releasing the carbon which is stored in the trees will increase global warming. About 200,000 acres of the rainforest are destroyed every day.

Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and Development Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro-industrial development. This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia. It reveals how environmental organizations such as Greenpeace, Friends of the Earth, WWF, and others have fought fiercely to stop deforestation in the region. It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil's position in an evolving capitalist world economy. It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia. The author analyses how globalization has led to the expansion of international commodity chains in the region, particularly for mineral ores, soybeans, and beef. He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products, while other pro-development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources.

Rain Forests HaiSong Harvey,2002 Rain forests contain the greatest variety of animal and plant life on earth and they are being destroyed more rapidly than any other type of wild habitat Many environmentalists and scientists believe that almost all the rain forests will be eliminated in less than thirty years Others continue to believe that the threat of their destruction is exaggerated This anthology debates the threats to the rain forests and measures designed to ensure their continued existence **Wildlife Fact-file Yearbook, 1993** ,1993

The Chase Alan Refkin,2022-10-12 Lieutenant Colonel Doug Cray the leader of a presidential special ops team hasn t been on vacation in years Recovering from an assassin s bullet he decides that taking a cruise down the Amazon River would fulfill his childhood dream of seeing the rainforest and provide a much needed rest However the thin man who hired the assassin isn t going to give up on killing him After learning that Cray is taking an Amazon cruise he bribes a corrupt Brazilian Army colonel to shoot down the floatplane taking him to the ship Although that succeeds and he s presumed dead the thin man wants a photo of the body as proof However the only way to get that is for the Brazilian colonel to send his military death squad into the jungle to get a picture of the corpse or put a bullet into the ex Army Ranger if he somehow miraculously survived There s one problem the coordinates of where the plane went down show it s in the Javari Valley the most unexplored area on the planet for which no map exists headhunters roam with abandon and the dense jungle canopy blocks all communications and navigational data Unable to contact his special ops team in Washington who have vowed to leave him alone believing he s having a great time sucking down drinks and eating gourmet meals on the luxury ship Cray knows he s living on borrowed time after seeing his badly infected wound and unable to find his way out of the unmapped valley As if things couldn t get worse the military squad finally finds him and the chase ensues In this latest Matt Moretti Han Li thriller Cray must get out of the most hostile jungle on the planet while being chased by an experienced military death squad and battling an infection rapidly spreading through his body *Santa Clara Law Review* ,1989 **World Rainforest Report** ,1988 *Yearbook of International Organizations 2005/2006* ,2005-06 For the Yearbook of International Organizations the most up to date and comprehensive reference to international organizations the UIA has selected the most important 31 086 organizations from its extensive database of current and previous organizations Yearbook provides profiles of 5 546

intergovernmental and 25 540 international non governmental organizations active in nearly 300 countries and territories in the world today Organization descriptions listed in Volume 1 are numbered sequentially to facilitate quick and easy cross referencing from the other Yearbook Volumes Users can refer to Volumes 2 and 3 to locate organizations by region or subject respectively and comprehensive indexes are included Naturally the high standards of accuracy consistency and detail set by previous editions of the Yearbook of International Organizations have been maintained for this edition Encyclopedia of Our Earth John Clark,1995 This book tells you what causes such phenomena as earthquakes and weather while easy to understand photos and illustrations reveal many of the secrets that occur above around and beneath our very feet **The Rough Guide to Ecuador** Harry Adès,Melissa Graham,2007 This edition gives an insight into Ecuador s many highlights from snorkelling in the Galapagos to exploring Quito s colonial churches It gives reviews of all the best places to stay eat and drink and information on Ecuador s history culture indigenous peoples and environmental issues **International Environment Reporter** ,2005 Pace International Law Review ,2000 **Deforestation** Armando Ang,2006 Mother Earth is undergoing an environmental upheaval as never seen before The unprecedented number of people bearing down on earth has greatly affected the environment of our planet Whether we are rich or poor developed or underdeveloped nations we are all together for better or for worse for the well being of this planet Of all the problems besieging the planet rampant deforestation is probably the single most important problem we face today The ecological problems directly and indirectly connected with deforestation are numerous and require immediate remedies Global warming and loss of biodiversity are two problems of universal ramification for mankind that need to be resolved if mankind is to continue to exist for the next thousand years After air water and food trees are the most important natural resources that mankind need Otherwise God would not have created trees in the third day of the creation story in preparation for man s beginnings and existence It is also one of the most important renewable resources that will serve mankind for eons if we only learn to respect the role they play in our lives Since men first walked on the planet he was surrounded by trees with all their fruits and wildlife for his benefit For centuries it has provided mankind with all the resources necessary for him to survive the harsh climate With so much of our forests lost to human needs and greed it is necessary for us to change the way we appreciate the immense value of trees All the wealth of the nations around the world is found in their natural resources They could be the under the sea under the sand under the forests and over the top of the land surfaces Without these resources civilizations would not have advanced to this point in time Except for the food from the sea and the forests on the land all the other natural resources are considered non renewable Yet at the rate we are exploiting some of these resources they too would become non renewable and even extinct The Food and Agriculture Organization FAO reported in 2001 that In many countries illegal operations proliferate and governments are unable to control their own bureaucracies or to enforce adherence to the rules of the game by commercial corporations and civil society entities In extreme circumstances private corporations or powerful groups are able to sway

government policies and purchase decrees legislation and regulations for their own benefit Poverty has driven many to seek their fortunes in the forests Some practice slash and burn while others try to eke out their livelihood by small scale mining in the hope of striking it rich But more often than not they end up with nothing to show but sufferings and ill health for all their efforts The same is true for all the workers in the forestry sector They toil long hours under difficult hardship only to enrich the concessionaires who stay in their air conditioned offices in the cities The poor indigenous people have lost most of their livelihood and are forced to turn to swidden cultivation to survive As their ancestral lands are taken over by greedy government bureaucrats and given away to domestic and multinational companies their only recourse was to fight a losing battle There have been some effective actions undertaken mostly by the NGOs It is doubtful if it will put a dent against the destructive forces now in place and deeply entrenched The only way to stop the greedy scums is to legislate stiffer laws against illegal poaching and even wanton destruction of forestlands by licensed loggers and impose on them the ultimate death penalty and carry it out without delay It is often the fear of death that can force a greedy person to act rationally In this book I have tried to set down the many causes of deforestation the consequences of what will happen if we fail to act to protect the trees and enact measures to minimize the problems Audiovisual Materials ,1980 **Rainforests** James L.
