Conducting Online Research on Amazon Mechanical Turk and Beyond Leib Litman,Jonathan Robinson,2020-05-12 Conducting Online Research on Amazon Mechanical Turk and Beyond written by Leib Litman and Jonathan Robinson provides both students and experienced researchers with essential information about the online platforms most often used for social science research This insightful and accessible text answers common questions like How do I maintain data quality in online studies What is the best way to recruit hard to reach samples and How can researchers navigate the ethical issues that are unique to online research Drawing on their experiences as the founders of CloudResearch formerly TurkPrime the authors provide information that guides new users planning their first online studies and engages even the most experienced

researchers with detailed discussions about the challenges of online research The book begins with an overview of Amazon's Mechanical Turk and its rapid rise within academic research Then the authors describe how to set up an MTurk study with screenshots that walk readers through the steps of creating an account designing a study collecting data and using third party applications to enhance MTurk's functionality Later chapters provide readers with a detailed understanding of the MTurk environment and use data from hundreds of thousands of participants and tens of millions of completed tasks to dive into issues like participant demographics sources of sampling bias and the generalizability of findings from MTurk Finally the book explores the benefits of using other online platforms as a complement to MTurk and the ethical issues that are unique to conducting research with online participant platforms Throughout the book the authors share hands on advice and best practices such as those for conducting longitudinal studies or carrying out complex studies Altogether the mix of data insight and advice make this book an essential resource for researchers who want to understand the online environment and the most effective ways to conduct research online

Envisioning the Faculty for the Twenty-First Century Adrianna Kezar, Daniel Maxey, 2016-09-12 The institution of tenure once a cornerstone of American colleges and universities is rapidly eroding Today the majority of faculty positions are part time or limited term appointments a radical change that has resulted more from circumstance than from thoughtful planning As colleges and universities evolve to meet the changing demands of society how might their leaders design viable alternative faculty models for the future Envisioning the Faculty for the Twenty First Century weighs the concerns of university administrators professors adjuncts and students in order to critically assess emerging faculty models and offer informed policy recommendations Cognizant of the financial pressures that have led many universities to favor short term faculty contracts higher education experts Adrianna Kezar and Daniel Maxey assemble a top notch roster of contributors to investigate whether there are ways to modify the existing system or promote new faculty models They suggest how colleges and universities might rethink their procedures for faculty development hiring scheduling and evaluation in order to maintain a campus environment that still fosters faculty service and student centered learning Even as it asks urgent questions about how to retain the best elements of American higher education Envisioning the Faculty for the Twenty First Century also examines the opportunities that systemic changes might create Ultimately it provides some starting points for how colleges and universities might best respond to the rapidly evolving needs of an increasingly global society

Telling Stories with Data Rohan Alexander,2023-07-27 The book equips students with the end to end skills needed to do data science That means gathering cleaning preparing and sharing data then using statistical models to analyse data writing about the results of those models drawing conclusions from them and finally using the cloud to put a model into production all done in a reproducible way At the moment there are a lot of books that teach data science but most of them assume that you already have the data This book fills that gap by detailing how to go about gathering datasets cleaning and preparing them before analysing them There are also a lot of books that teach statistical modelling but few of them teach how to communicate the results of the models and how they help us learn about the world Very few data science textbooks cover ethics and most of those that do have a token ethics chapter Finally reproducibility is not often emphasised in data science books This book is based around a straight forward workflow conducted in an ethical and reproducible way gather data prepare data analyse data and communicate those findings This book will achieve the goals by working through extensive case studies in terms of gathering and preparing data and integrating ethics throughout It is specifically designed around teaching how to write about the data and models so aspects such as writing are explicitly covered And finally the use of GitHub and the open source statistical language R are built in throughout the book

Key Features Extensive code examples Ethics integrated throughout Reproducibility integrated throughout Focus on data gathering messy data and cleaning data Extensive formative assessment throughout

The Cambridge Handbook of Technology and Employee Behavior Richard N. Landers,2019-02-14 Experts from across all industrial organizational IO psychology describe how increasingly rapid technological change has affected the field In each chapter authors describe how this has altered the meaning of IO research within a particular subdomain and what steps must be taken to avoid IO research from becoming obsolete This Handbook presents a forward looking review of IO psychology s understanding of both workplace technology and how technology is used in IO research methods Using interdisciplinary

perspectives to further this understanding and serving as a focal text from which this research will grow it tackles three main questions facing the field First how has technology affected IO psychological theory and practice to date Second given the current trends in both research and practice could IO psychological theories be rendered obsolete Third what are the highest priorities for both research and practice to ensure IO psychology remains appropriately engaged with technology moving forward
