An Essential Text Unlike Any Other in the Field

Surveys administered to high school students studies carried out on jail and prison inmates and interviews conducted with substance abusers undergoing treatment all point to the same conclusion drugs and crime are strongly connected Why they are connected is less well understood however

Written for middle to upper level undergraduate courses on drugs and crime or substance abuse and crime this book examines the drug crime connection in a systematic and comprehensive way

Drugs Crime and Their Relationships covers the entire drug crime spectrum starting with a review of drug and crime terminology classification and theory and ending with policy implications for prevention harm reduction and macro level management of the drug crime problem

The opening chapters discuss drugs and crime separately for the purpose of setting the stage for later discussions on drug crime relationships

As the book proceeds the boundaries between drugs and crime blur thus revealing the complex and intimate relationship that links these two behaviors

Drugs Crime and Their Relationships is divided into four sections

The first section offers an introduction and overview of theories on drugs crime and their relationships

The second section explores the relevant research on the biological psychological sociological and static situational correlates of drug crime relationships

The third section considers the practical implications of drug crime connections for the criminal justice system offender assessment and treatment programming

The fourth and final section examines the policy implications of the drug crime relationship in the form of prevention harm reduction and society's response to drugs and drug related crime

Students will enjoy the engaging writing style instructors will welcome the logical manner in which the text is organized and scholars will appreciate the comprehensiveness of coverage and the range of citations
