Interventional Critical Care Dennis A. Taylor, Scott P. Sherry, Ronald F. Sing, 2021-07-19. The goal of the first edition of *Interventional Critical Care: A Manual for Advanced Care Practitioners* was to fill a knowledge gap of the advanced practice provider (APP) specifically regarding the skills and understanding of critical care procedures in response to the rapidly expanding participation of APPs in critical care. Written by experts in the field, this successor edition adds to the content of the first by expanding upon ultrasonography areas to include more direct hemodynamic evaluations as well as the newer eFAST. It also explores the specialty of Urology to include more complex interventions. As billing and coding are necessary, the authors added appropriate CPT codes for each of the appropriate chapters. Most chapters have been completely re-written and updated from the first edition and have different authors, thereby a different perspective and experience level. *Interventional Critical Care 2nd Edition* serves as a valuable reference for physicians and advanced practice providers in daily practice in the ICU, OR, and/or ED setting.
