for you and those you can keep exploring and why not improving Speed reading can be condensed into a single sentence but that doesn't change the facts of the matter If I want to go to the gym because I want to have a worked body and the trainer shows me the exercises I need to do in a session that doesn't automatically mean I'll look good It's one thing to learn technique in a few minutes and another to exercise every day You need willpower discipline and determination to repeat the basic exercises daily Without constant effort you cannot achieve results If you go to the gym three times a week then you start to form a habit and this habit helps you to live in the culture of sport Being connected to the information in that sport and being able to generate so much enthusiasm that it counteracts your desire to give up the fight and return to your comfort zone That's why I wrote about speed reading to start living in the culture of this wonderful field You have speed reading on your side With it you can get to break the 1000 words per minute barrier That means you'll be able to read four times faster than the average person with the same or even better comprehension of the text

EXAMS AND SPEED READING Silviu Vasile, There are many books programs and speed reading trainings that offer information but few that offer value There are more and more people who want to teach you about speed reading which is basically great It's just that there from the information about this extraordinary field you have to be able to extract the essence and be able to pass it on I've been studying speed reading for the last 15 years I have done it with passion and dedication I have made speed reading an important goal and I have lived in the culture of speed reading I have spent thousands of hours thinking about what is important in this area and I think I have come to understand the importance of speed reading for the mind and body What I present in my books is information that you can put to use immediately getting good and great results What you start building today will become the cornerstone of your personal and professional success tomorrow The more you decide to invest in valuable knowledge the more it will transform you and make you a person capable of climbing step by step to the place where you can reap the full fruits of your labour It's a long road to get there and I'd be lying to you if I said it was an easy road You need a lot of willpower and discipline to be able to take those exams that life offers you as a chance to find out who you really are and what are the

things that limit you inside All those inner limitations will stop you in your tracks block you or turn you back even when you may have very little left to finish What you learn from speed reading will help you make choices and not just any choices but choices that will bring real change to your life Think of yourself as living in a consumer world and if you look back you will see that you have bought many products and services that you have not used You've bought a subscription you didn't use or a fitness machine you used a few times and then forgot about it When you bought it you promised yourself that you would use it every day and yet you didn't It happened because you didn't live or don't live long enough in the culture of that thing You don't realize how important it is and how much you need to exercise otherwise you would find the time and energy to exercise regularly maybe even daily

The Physiology of the Novel Nicholas Dames, 2007-09-27 How did the Victorians read novels Nicholas Dames answers that deceptively simple question by revealing a now forgotten range of nineteenth century theories of the novel a range based in a study of human physiology during the act of reading He demonstrates the ways in which the Victorians thought they read and uncovers surprising responses to the question of what might have transpired in the minds and bodies of readers of Victorian fiction His detailed studies of novel critics who were also interested in neurological science combined with readings of novels by Thackeray Eliot Meredith and Gissing propose a vision of the Victorian novel reader as far from the quietly immersed being we now imagine as instead a reader whose nervous system was addressed attacked and soothed by authors newly aware of the neural operations of their public Rich in unexpected intersections from the British response to Wagnerian opera to the birth of speed reading in the late nineteenth century *The Physiology of the Novel* challenges our assumptions about what novel reading once did and still does to the individual reader and provides new answers to the question of how novels influenced a culture's way of reading responding and feeling
