Rigorous Mathematical Thinking James T. Kinard,Alex Kozulin,2008-06-02 This book demonstrates how rigorous mathematical thinking can be fostered through the development of students cognitive tools and operations This approach seems to be particularly effective with socially disadvantaged and culturally different students The authors argue

that children's cognitive functions cannot be viewed as following a natural maturational path they should be actively constructed during the educational process The Rigorous Mathematical Thinking RMT model is based on two major theoretical approaches Vygotsky's theory of psychological tools and Feuerstein's concept of mediated learning experience The book starts with general cognitive tools that are essential for all types of problem solving and then moves to mathematically specific cognitive tools and methods for utilizing these tools for mathematical conceptual formation The application of the RMT model in various urban classrooms demonstrates how mathematics education standards can be reached even by the students with a history of educational failure who were considered hopeless underachievers 50 Leveled Math Problems Level 3 Linda Dacey, 2012-04-01 Developed in conjunction with Lesley University this engaging resource for third grade provides effective research based strategies to help teachers differentiate problem solving in the classroom It includes 50 leveled math problems 150 problems total an overview of the problem solving process and ideas for formative assessment of students problem solving abilities It also includes 50 mini lessons and a student activity sheet featuring a problem tiered at three levels plus digital resources that include electronic versions of activity sheets This resource was developed with College and Career Readiness in mind is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills and supports core concepts of STEM instruction **Put Thinking to the Test** Lori Conrad, Missy Matthews, Cheryl Zimmerman, Patrick A.
