Incorrect 

Correct answer(s)

Correct answer(s)

82.

Students understand that a line has a slope, meaning "the amount that the dependent variable goes up every time the independent variable increases by one unit." Understanding that a line represents more than the slope (i.e. slope-intercept form) is a more complex skill, which is not the focus of the question.

Correct 

83.

The following graph shows the number of people who died in the 2004 hurricane. The relationship between deaths and time is not linear, which is not the focus of the question. The graph also does not show the number of people who died in the 2004 hurricane.

Correct 

84.

Students will be able to use the relationship between the number of people who died in the 2004 hurricane and the number of people who died in the 2004 hurricane to find the number of people who died in the 2004 hurricane.

(A) The number of people who died

(B) The number of people who died in the 2004 hurricane and the number of people who died in the 2004 hurricane
