

2. On your own: Look up Annie Jump Cannon on the Internet or in a library and read her story. Share your discoveries with your classmates and teacher.

The creation of modern star classification was made possible by the cataloging work of American astronomer Annie Jump Cannon.

Activity B: Unusual stars	<u>Get the Gizmo ready:</u> • Select star 5.	
--	--	---

Question: What else can we learn from stellar spectra?

1. Observe: Observe the spectra of stars 5 – 10. Identify the elements in each spectrum, and try to classify each star. If you notice unusual features in these spectra, describe them.

Star	Color	Elements in spectrum	Class	Unusual features
5	Yellow	None of the elements match	G	Similar to sodium's double line, however they are displaced
6	Red	Neutral titanium oxide and neutral iron (not shown)	M	The neutral magnesium does not fit since it has some more pronounced black lines than the original magnesium.
7	Blue-White	Hydrogen, Neutral helium	B	Normal
8	Yellow	Calcium, Neutral sodium	G	The light flickers, moves up and down, and there are some unfamiliar dark lines in the neutral sodium.
9	White	Ionized calcium, Hydrogen, Neutral sodium	F	Calcium did not match neither ionized or neutral, besides moving sometimes
10	Yellow	Calcium, Neutral sodium	G	Normal

Match: Write the number of the star or object that matches each description. Then use this information to help you identify the elements and reclassify the stars in the table above.

- 3 High atmospheric pressures in a star cause spectral lines to be broadened, or "smeared out." **Giant stars**, which have relatively low atmospheric pressures, are characterized by narrow spectral lines.
- 2 If a star is moving away from an observer, spectral lines are **redshifted**, or shifted toward the red end of the spectrum. An approaching star is **blueshifted**.
- 8 A star orbited by a large planet will move in a small circle. This will cause its spectrum to be slightly redshifted part of the time and blueshifted at other times.

Objective English for Competitions , Harrington on Modern Tournament Poker Dan Harrington,Bill

Robertie,2014-05-08 Over the last ten years the enormous growth of interest in poker and poker tournaments has led to an intense focus on the theory of tournament poker The result was a re examination of old ideas and the introduction of many new ones The fundamentals of no limit hold em did not change but the game was revealed to have more depth than many older players could have anticipated As a result no limit hold em tournament play has evolved into a newer tougher faster game and good players have had to evolve to keep up In *Harrington on Modern Tournament Poker* Dan Harrington takes a fresh look at the world of no limit hold em tournaments He explains how the game is currently played and what you ll have to do to be a successful tournament player in 2013 and beyond The topics examined include how to play different hand types preflop when to 3 bet and 4 bet how to analyze the flop turn and river and how to size your bets Dan also explains how to adjust your strategy as your stack size grows and shrinks and how to handle the new breed of super aggressive players that you ll meet at the table and if you want how to play that way yourself Dan Harrington won the Gold Bracelet and the World Champion Title at the Main Event of the 1995 World Series of Poker And he was the only player in recent history to make the final table in back to back years 2003 and 2004 considered by cognoscenti to be the greatest accomplishment in WSOP history
