

## Student Exploration: Cell Division

### Activity B:

#### Duration of phases

Get the Gizmo ready:

- Select the TABLE tab.

**Question:** What is the relative duration of each phase of the cell cycle?

1. **Collect data:** Set the **Cycle Length** to 10 hours and click **Play**. Click **Pause** when the maximum number of cells has been reached. On the **TABLE** tab, click **Record data**.

Record the number of cells in each phase of the cell cycle in the table below. Then click **Play**, wait for a while, and click **Record data** again. Repeat this process until you have recorded four sets of results, and then find the average number of cells in each phase.

| Trial | Interphase | Prophase | Metaphase | Anaphase | Telophase | Cytokinesis |
|-------|------------|----------|-----------|----------|-----------|-------------|
| 1     | 77         | 10       | 3         | 3        | 3         | 4           |
| 2     | 78         | 11       | 3         | 1        | 2         | 5           |
| 3     | 80         | 10       | 3         | 0        | 4         | 3           |
| 4     | 80         | 10       | 4         | 2        | 3         | 1           |
| Avg.  | 78.75      | 10.25    | 3.25      | 1.5      | 3         | 3.25        |

2. **Analyze:** Which phase of the cell cycle is longest? **Interphase** Shortest? **Metaphase**

**Why:** Cells spend lots of time in interphase, so if we see a large number of them in interphase at any given moment, such as this one. Cells spend less time in metaphase, so the chance that we see many cells in that phase is very small.

3. **Calculate:** You can use your data to estimate the duration of each phase of the cell cycle. For example, if 8% of the cells were in prophase and the cell cycle was 10 hours long, then prophase would last 8% of 10 hours, or 0.8 hours (48 minutes).

Use percentages to estimate the duration of each phase of the cell cycle. Show your work.

**Interphase:**  $78.75 \times 10 = 7.9$  hours

**Prophase:**  $0.1025 \times 10 = 1.025$  hours

**Metaphase:**  $0.0325 \times 10 = 3.25$  hours

**Interdisciplinary Research and Innovation in Bilingual and Second Language Teacher Education** M. Dolores Ramírez-Verdugo, 2024-04-12 The book provides a comprehensive overview of international pedagogical approaches, research, innovation, experiences, and best practices in bilingual and second language education to enhance bilingual teacher education programs. The book clearly outlines the need for an interdisciplinary and interconnected approach to effecting successful bilingual teacher education programs. Featuring practical examples from a wide range of geographic contexts throughout the volume, it comprises diverse pedagogical approaches to bilingual and second language teacher education, bilingual and plurilingual education, storytelling, digital storytelling, and digital technology and content and language integrated learning (CLIL), including methodological strategies in bilingual education as well as quality standards in CLIL, syllabus design, assessment. The book concludes by reflecting on the lessons learned from research and identifies future directions for bilingual education programs and bilingual teacher education. The volume will be of interest to students and scholars in bilingual and second language education, bilingual teacher education, CLIL, as well as educators and stakeholders in bilingual CLIL and English teacher education degree programs.

**K-12 STEM Education: Breakthroughs in Research and Practice** Management Association, Information Resources, 2017-10-31 Education is vital to the progression and sustainability of society. By developing effective learning programs, this creates numerous impacts and benefits for future generations to come. K-12 STEM Education Breakthroughs in Research and Practice is a pivotal source of academic material on the latest trends, techniques, technological tools, and scholarly perspectives on STEM education in K-12 learning environments. Including a range of pertinent topics such as instructional design, online learning, and educational technologies, this book is an ideal reference source for teachers, teacher educators, professionals, students, researchers, and practitioners interested in the latest developments in K-12 STEM education.

**Emerging Technologies for the Classroom** Chrystalla Mouza, Nancy Lavigne, 2012-11-07 This book provides contemporary examples of the ways in which educators can use digital technologies to create effective learning environments that support improved learning and instruction. These examples are guided by multiple conceptual and methodological traditions evolving from the learning sciences and instructional technology communities, as well as other communities doing important work on learning technologies. In particular, the book provides examples of technology innovations and the ways in which educators can use them to foster deep understanding, collaboration, creativity, invention, and reflection. Additional

examples demonstrate the ways in which emerging mobile and networked technologies can help extend student learning beyond the confines of the classroom wall and support student directed learning and new media literacies

Revolutionizing K-12 Blended Learning through the i<sup>2</sup>Flex Classroom Model Avgerinou, Maria D.,Gialamas, Stefanos P.,2016-06-20 Blended learning has gained significant attention recently by educational leaders practitioners and researchers i Flex a variation of blended learning is based on the premise that certain non interactive teaching activities such as lecturing can take place by students without teachers direct involvement Classroom time can then be used for educational activities that fully exploit teacher student and student student interactions allowing for meaningful personalized feedback and scaffolding on demand Revolutionizing K 12 Blended Learning through the i Flex Classroom Model presents a well rounded discussion on the i Flex model highlighting methods for K 12 course design delivery and evaluation in addition to teacher performance assessment in a blended i Flex environment Emphasizing new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers this publication is an essential reference source for pre service and in service teachers researchers administrators and educational technology developers
