Employability is attracting growing attention from researchers and practitioners alike given the contemporary employment landscape one characterized by technological changes ageing populations and competitive organizational environments This interest is in part motivated by the realisation that employability implies a win win situation as employable workers have stocks of knowledge skills and abilities and they are flexible and open to change However the role of the employer and specifically their investments in Human Resource Management policies and practices are largely absent in the current employability discourse Employability is usually regarded as an individual asset in which employees carry almost all responsibility for employability maintenance and development Remarkably little has been done to remedy the neglect of the employer perspective and advance knowledge and practice This book brings together contributions from an international

team of renowned management scholars who explore how Human Resource Management investments affect workers employability Drawing on empirical evidence from all over the world this book informs researchers practitioners and students in the fields of business and management especially those with a particular interest in HRM and organizational behaviour The chapters in this book were originally published as a special issue of The International Journal of Human Resource Management

Dangerous Tides Ulrike Gehring, Simon Karstens, Christian Rollinger, 2025-08-18 The dangers and risks lurking in the deep waters of the world be they profane and natural storms currents shoals cliffs pirates or divine and supernatural the wrath of one or more gods magic sea monsters are as individual and diverse as the stories of their consequences and as numerous as the intentions behind these retellings and reconfigurations In their telling specific dangers become accepted risks that those who undertake the venture of a sea voyage choose or not to expose themselves to Maritime actors make their assessments of the balance between risk and benefit according to historical and contemporary cultural criteria which are contingent on the discursive horizon of their time as reflected in iconographic and textual sources Building on sociological and historical understandings of risk as conscious exposure to specific dangers the case studies in this volume engage with conceptions and discourses of maritime risks in written and visual media from antiquity to the early modern world with contributions ranging from early Greek epic to British Atlantic merchants in the 1700s This broad perspective enables a multifaceted study of representations of maritime dangers in words images and numbers and to discuss contemporary discourses on causes consequences and methods for avoidance of maritime risk

Diversity, Inclusion and Culture Wars in Psychotherapy Del Loewenthal, 2024-06-21 For the psychotherapist psychological therapist notions of diversity and inclusion such as intersectional feminist trans critical race whiteness migration in equality queer disability post colonial decolonial approaches and studies are both increasingly important and yet increasingly difficult This book explores these developments and raises the important questions Are these difficulties to do

with the biases of the person who is the psychotherapist and or could it also sometimes have to do with how diversity inclusion and related terms are constructed Crucially clients may now find it difficult to find a therapist who is able to explore with them their concerns around diversity and inclusion which can be complicated and may take time to consider This book presents cutting edge research to enable explorations of our changing world which is so different to the one we were born into let alone our often older own psychotherapists and supervisors Diversity Inclusion and Culture Wars in Psychotherapy will be a beneficial read for students and scholars of Psychology including Psychotherapy and Counselling The chapters in this book were originally published as a special issue of European Journal of Psychotherapy and Counselling

Post-Colonial Trajectories in the Caribbean Rosemarijn Hoeffte, Matthew L. Bishop, Peter Clegg, 2016-11-18 This book compares and contrasts the contemporary development experience of neighbouring geographically similar countries with an analogous history of exploitation but by three different European colonisers Studying the so called Three Guianas Guyana Suriname and French Guiana offers a unique opportunity to look for similarities and differences in their contemporary patterns of development particularly as they grapple with new and complex shifts in the regional hemispheric and global context Shaped decisively by their respective historical experiences Guyana in tandem with the laissez faire approach of Britain toward its Caribbean colonies was decolonised relatively early in 1966 and has maintained a significant degree of distance from London The hold of The Hague over Suriname however endured well after independence in 1975 French Guiana by contrast was decolonised much sooner than both of its neighbours in 1946 but this was through full integration thus cementing its place within the political economy and administrative structures of France itself Traditionally isolated from the Caribbean the wider Latin American continent and from each other today a range of similar issues such as
